U.S. Large Company Portfolio

Investment Objective

The U.S. Large Company Portfolio (the "Portfolio") seeks, as its investment objective, to approximate the total investment return of the S&P 500® Index.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Large Company Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.06%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.09%
Fee Waiver and/or Expense Reimbursement*	0.01%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.08%

* Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees and in certain instances, assume certain expenses of the U.S. Large Company Portfolio. The Fee Waiver and Expense Assumption Agreement for the Portfolio will remain in effect through February 28, 2023, and may only be terminated by the Fund's Board of Directors prior to that date. The Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed up to thirty-six months after such waiver and/or expense assumption.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Large Company Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. The costs for the Portfolio reflect the net expenses of the Portfolio that result from the contractual expense waiver in the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$8	\$28	\$50	\$114

PORTFOLIO TURNOVER

The U.S. Large Company Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 4% of the average value of its investment portfolio.

Principal Investment Strategies

The U.S. Large Company Portfolio generally invests in the stocks that comprise the S&P 500® Index in approximately the proportions they are represented in the S&P 500® Index. The S&P 500® Index comprises a broad and diverse group of stocks. Generally, these are the U.S. stocks with the largest market capitalizations and, as a group, they generally represent approximately 80% of the total market capitalization of all publicly traded U.S. stocks. For the Portfolio, the Advisor considers the stocks that comprise the S&P 500® Index to be those of large companies. Under normal market conditions, at least 95% of the Portfolio's net assets will be invested in the stocks that comprise the S&P 500® Index. As a non-fundamental policy, under normal circumstances, the Portfolio will invest at least 80% of its net assets in securities of large U.S. companies.

Ordinarily, portfolio companies will not be sold except to reflect additions or deletions of the companies that comprise the S&P 500® Index, including as a result of mergers, reorganizations and similar transactions and, to the extent necessary, to provide cash to pay redemptions of the U.S. Large Company Portfolio's shares. Given the impact on prices of securities affected by the reconstitution of the S&P 500® Index around the time of a reconstitution date, the Portfolio may purchase or sell securities that may be impacted by the reconstitution before or after the reconstitution date of the S&P 500® Index. In seeking to approximate the total investment return of the S&P 500® Index, the Advisor may also adjust the representation of securities in the Portfolio after considering such securities' characteristics and other factors the Advisor determines to be appropriate.

The U.S. Large Company Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Large Company Portfolio may lend its portfolio securities to generate additional income.

About the S&P 500® Index: The Standard & Poor's 500 Composite Stock Price Index® is market capitalization weighted (adjusted for free float). Its performance is usually cyclical because it reflects periods when stock prices generally rise or fall. For information concerning S&P Global Ratings, a division of The McGraw Hill Companies ("S&P"), and disclaimers of S&P with respect to the U.S. Large Company Portfolio, see "**Standard & Poor's—Information and Disclaimers.**"

Principal Risks

Because the value of your investment in the U.S. Large Company Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor’s control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio’s and its service providers’ use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Large Company Portfolio’s returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio’s performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio’s past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>.

The after-tax returns presented in the table for the U.S. Large Company Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

U.S. Large Company Portfolio Institutional Class Shares—Total Returns

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Large Company Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Joseph F. Hohn**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2017.
- **Joel P. Schneider**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2019.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Large Company Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Large Company Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Large Company Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Enhanced U.S. Large Company Portfolio

Investment Objective

The Enhanced U.S. Large Company Portfolio (the "Portfolio") seeks, as its investment objective, to achieve a total return which exceeds the total return performance of the S&P 500® Index. Total return comprises income and capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the Enhanced U.S. Large Company Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.12%
Other Expenses	0.05%
Total Annual Fund Operating Expenses	0.17%
Fee Waiver and/or Expense Reimbursement*	0.02%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.15%

* Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees and in certain instances, assume certain expenses of the Enhanced U.S. Large Company Portfolio. The Fee Waiver and Expense Assumption Agreement for the Portfolio will remain in effect through February 28, 2023, and may only be terminated by the Fund's Board of Directors prior to that date. The Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed up to thirty-six months after such fee waiver and/or expense assumption.

EXAMPLE

This Example is meant to help you compare the cost of investing in the Enhanced U.S. Large Company Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. The costs for the Portfolio reflect the net expenses of the Portfolio that result from the contractual expense waiver in the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$15	\$53	\$94	\$215

PORTFOLIO TURNOVER

The Enhanced U.S. Large Company Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 70% of the average value of its investment portfolio.

Principal Investment Strategies

The Enhanced U.S. Large Company Portfolio seeks to outperform the S&P 500[®] Index primarily through investment in S&P 500[®] Index futures and short-term fixed income obligations. The Portfolio may invest in all of the stocks represented in the S&P 500[®] Index, options on stock indices, stock index futures, options on stock index futures, swap agreements on stock indices and shares of investment companies, such as exchange-traded funds (ETFs) that invest in stocks represented in the S&P 500[®] Index or other similar stock indices. The Portfolio invests in fixed income obligations, which may include securities of foreign issuers. The Portfolio may, from time to time, also invest in options on stock indices, stock index futures, options on stock index futures and swap agreements based on indices other than, but similar to, the S&P 500[®] Index (such instruments whether or not based on the S&P 500[®] Index are hereinafter collectively referred to as "Index Derivatives"). The S&P 500[®] Index comprises a broad and diverse group of stocks. Generally, these are the U.S. stocks with the largest market capitalizations and, as a group, they generally represent approximately 80% of the total market capitalization of all publicly traded U.S. stocks. The Advisor considers stocks that comprise the S&P 500[®] Index to be those of large companies. Under normal circumstances, the Portfolio will invest at least 80% of its net assets in short-term fixed income obligations that are overlaid by futures, swaps and other derivatives of the S&P 500[®] Index to create exposure to the performance of large U.S. companies or in securities of large U.S. companies directly. Alternatively, the Portfolio may invest at least 80% of its net assets directly in securities of large companies.

The Enhanced U.S. Large Company Portfolio may invest all of its assets in Index Derivatives. Certain of these Index Derivatives may be considered speculative and may subject the Portfolio to additional risks. Assets of the Portfolio not invested in the S&P 500[®] Index or Index Derivatives may be invested in short-term fixed income obligations including: U.S. government obligations, U.S. government agency obligations, corporate debt obligations, bank obligations, commercial paper, repurchase agreements, money market funds, foreign government and agency obligations, supranational organization obligations, foreign issuer obligations and eurodollar obligations. The Portfolio's investment in fixed income obligations will be considered investment grade at the time of purchase. The fixed income obligations purchased by the Portfolio will typically mature within three years or less from the date of settlement and the average dollar-weighted maturity of the fixed income obligations will be two years or less.

The Enhanced U.S. Large Company Portfolio may use foreign currency forward contracts to hedge foreign currency risks or to transfer balances from one currency to another. The Portfolio uses index swap agreements and/or stock index futures to hedge against changes in securities prices. The Portfolio may purchase or sell futures contracts and options on futures contracts to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio. Additionally, the Portfolio uses index swap agreements and stock index futures to attempt to achieve its investment objectives.

The Enhanced U.S. Large Company Portfolio may lend its portfolio securities to generate additional income.

About the S&P 500[®] Index: The Standard & Poor's 500 Composite Stock Price Index[®] is market capitalization weighted (adjusted for free float). Its performance is usually cyclical because it reflects periods when stock prices generally rise or fall. For information concerning S&P Global Ratings, a division of The McGraw Hill Companies ("S&P"), and disclaimers of S&P with respect to the Enhanced U.S. Large Company Portfolio, see "**Standard & Poor's—Information and Disclaimers.**"

Principal Risks

Because the value of your investment in the Enhanced U.S. Large Company Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Foreign Securities and Currencies Risk: Foreign securities prices may decline or fluctuate because of: (a) economic or political actions of foreign governments, and/or (b) less regulated or liquid securities markets. Investors holding these securities may also be exposed to foreign currency risk (the possibility that foreign currency will fluctuate in value against the U.S. dollar or that a foreign government will convert, or be forced to convert, its currency to another currency, changing its value against the U.S. dollar). The Portfolio hedges foreign currency risk.

Foreign Government Debt Risk: The risk that: (a) the governmental entity that controls the repayment of government debt may not be willing or able to repay the principal and/or to pay the interest when it becomes due, due to factors such as political considerations, the relative size of the governmental entity's debt position in relation to the economy, cash flow problems, insufficient foreign currency reserves, the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies, and/or other national economic factors; (b) governments may default on their debt securities, which may require holders of such securities to participate in debt rescheduling; and (c) there is no legal or bankruptcy process by which defaulted government debt may be collected in whole or in part.

Derivatives Risk: Derivatives are instruments, such as swaps, futures, and options thereon, and foreign currency forward contracts, whose value is derived from that of other assets, rates or indices. Derivatives can be used for hedging (attempting to reduce risk by offsetting one investment position with another) or non-hedging purposes. Hedging with derivatives may increase expenses, and there is no guarantee that a hedging strategy will work. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains or cause losses if the market moves in a manner different from that anticipated by the Portfolio or if the cost of the derivative outweighs the benefit of the hedge. In regard to currency hedging, it is generally not possible to precisely match the foreign currency exposure of such foreign currency forward contracts to the value of the securities involved due to fluctuations in the market values of such securities and cash flows into and out of the Portfolio between the date a foreign currency forward contract is entered into and the date it expires. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, settlement, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested. Additional risks are associated with the use of swaps including counterparty and credit risk (the risk that the other party to a swap agreement will not fulfill its contractual obligations, whether because of bankruptcy or other default) and liquidity risk (the possible lack of a secondary market for the swap agreement). Credit risk increases when the Portfolio is the seller of swaps and counterparty risk increases when the Portfolio is a buyer of swaps. In addition, where the Portfolio is the seller of swaps, it may be required to liquidate portfolio securities at inopportune times in order to meet payment obligations or segregation requirements. Swaps may be illiquid or difficult to value.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Interest Rate Risk: Fixed income securities are subject to interest rate risk because the prices of fixed income securities tend to move in the opposite direction of interest rates. When interest rates rise, fixed income security prices fall. When interest rates fall, fixed income security prices rise. In general, fixed income securities with longer maturities are more sensitive to changes in interest rates. The Portfolio may be subject to a greater risk of rising interest rates due to the current period of historically low interest rates.

Credit Risk: Credit risk is the risk that the issuer of a security may be unable to make interest payments and/or repay principal when due. A downgrade to an issuer's credit rating or a perceived change in an issuer's financial strength may affect a security's value, and thus, impact the Portfolio's performance. Government agency obligations have different levels of credit support and, therefore, different degrees of credit risk. Securities issued by agencies and instrumentalities of the U.S. Government that are supported by the full faith and credit of the

United States, such as the Federal Housing Administration and Ginnie Mae, present little credit risk. Other securities issued by agencies and instrumentalities sponsored by the U.S. Government, that are supported only by the issuer's right to borrow from the U.S. Treasury, subject to certain limitations, and securities issued by agencies and instrumentalities sponsored by the U.S. Government that are sponsored by the credit of the issuing agencies, such as Freddie Mac and Fannie Mae, are subject to a greater degree of credit risk. U.S. government agency securities issued or guaranteed by the credit of the agency may still involve a risk of non-payment of principal and/or interest.

Income Risk: Income risk is the risk that falling interest rates will cause the Portfolio's income to decline because, among other reasons, the proceeds from maturing short-term securities in its portfolio may be reinvested in lower-yielding securities.

Call Risk: Call risk is the risk that during periods of falling interest rates, an issuer will call or repay a higher-yielding fixed income security before its maturity date, forcing the Portfolio to reinvest in fixed income securities with lower interest rates than the original obligations.

Liquidity Risk: Liquidity risk exists when particular portfolio investments are difficult to purchase or sell. To the extent that the Portfolio holds illiquid investments, the Portfolio's performance may be reduced due to an inability to sell the investments at opportune prices or times. Liquid portfolio investments may become illiquid or less liquid after purchase by the Portfolio due to low trading volume, adverse investor perceptions and/or other market developments. Liquidity risk includes the risk that the Portfolio will experience significant net redemptions at a time when it cannot find willing buyers for its portfolio securities or can only sell its portfolio securities at a material loss or at increased costs. Liquidity risk can be more pronounced in periods of market turmoil or in situations where ownership of shares of the Portfolio are concentrated in one or a few investors.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the Enhanced U.S. Large Company Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimension.com>.

The after-tax returns presented in the table for the Enhanced U.S. Large Company Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the Enhanced U.S. Large Company Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **David A. Plecha**, Global Head of Fixed Income Portfolio Management, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since inception (1996).
- **Joseph F. Kolerich**, Head of Fixed Income, Americas, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Alexander Fridman**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2020.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the Enhanced U.S. Large Company Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167.

Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the Enhanced U.S. Large Company Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the Enhanced U.S. Large Company Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Large Cap Equity Portfolio

Investment Objective

The investment objective of the U.S. Large Cap Equity Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Large Cap Equity Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.10%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.13%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.12% to 0.10% effective as of February 28, 2021.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Large Cap Equity Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$13	\$42	\$73	\$166

PORTFOLIO TURNOVER

The U.S. Large Cap Equity Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 7% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Large Cap Equity Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification

across companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Large Cap Equity Portfolio is designed to purchase a broad and diverse group of readily marketable securities of U.S. companies that the Advisor determines to be large capitalization companies within the U.S. Universe. A company's market capitalization is the number of its shares outstanding times its price per share. The Advisor generally defines the U.S. Universe as a market capitalization weighted set (e.g., the larger the company, the greater the proportion of the U.S. Universe it represents) of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. As of the date of this Prospectus, for purposes of the Portfolio, the Advisor considers large cap companies to be companies whose market capitalizations are generally in the highest 90% of total market capitalization within the U.S. Universe or companies whose market capitalizations are larger than or equal to the 1,000th largest U.S. company within the U.S. Universe, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible operating companies within the U.S. Universe. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a large cap company would be \$10,142 million or above. This threshold will change due to market conditions. As a non-fundamental policy, under normal circumstances, the Portfolio will invest at least 80% of its net assets in equity securities of large cap U.S. companies.

The Advisor may overweight certain securities, including smaller companies, lower relative price stocks, and/or higher profitability stocks within the large cap segment of the U.S. Universe. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time. The Advisor may also increase or reduce the U.S. Large Cap Equity Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Large Cap Equity Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Large Cap Equity Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Large Cap Equity Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Large Cap Equity Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and since inception returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimension.com>.

The after-tax returns presented in the table for the U.S. Large Cap Equity Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Large Cap Equity Portfolio. The following individuals are responsible for leading the day-to-day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since inception (2013).
- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Large Cap Equity Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Large Cap Equity Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Large Cap Equity Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Large Cap Value Portfolio

Investment Objective

The investment objective of the U.S. Large Cap Value Portfolio (the "Portfolio") is to achieve long-term capital appreciation. The Portfolio is a Feeder Portfolio and pursues its objective by investing substantially all of its assets in its corresponding Master Fund, The U.S. Large Cap Value Series (the "U.S. Large Cap Value Series" or the "Series") of The DFA Investment Trust Company (the "Trust"), which has the same investment objective and policies as the Portfolio.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Large Cap Value Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*, **

Management Fee	0.29%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.32%
Fee Waiver and/or Expense Reimbursement	0.10%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.22%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Feeder Portfolio from 0.23% to 0.19% effective as of February 28, 2021.

**The "Management Fee" includes an investment management fee payable by the Feeder Portfolio and an investment management fee payable by the Master Fund. For any period when the Feeder Portfolio is invested in other funds managed by Dimensional Fund Advisors LP (the "Advisor") (collectively, "Underlying Funds"), the Advisor has contractually agreed to permanently waive the Feeder Portfolio's direct investment management fee to the extent necessary to offset the proportionate share of any Underlying Fund's investment management fee paid by the Feeder Portfolio through its investment in such Underlying Fund. The amounts set forth under "Other Expenses" and "Total Annual Fund Operating Expenses" reflect the direct expenses of the Feeder Portfolio and the indirect expenses of the Feeder Portfolio's portion of the expenses of the Master Fund.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Large Cap Value Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$23	\$71	\$124	\$280

The Example reflects the aggregate annual operating expenses of the U.S. Large Cap Value Portfolio and the Portfolio's portion of the expenses of the U.S. Large Cap Value Series.

PORTFOLIO TURNOVER

The U.S. Large Cap Value Series pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the U.S. Large Cap Value Portfolio’s performance. During the most recent fiscal year, the Series’ portfolio turnover rate was 10% of the average value of its investment portfolio.

Principal Investment Strategies

The U.S. Large Cap Value Portfolio pursues its investment objective by investing substantially all of its assets in the U.S. Large Cap Value Series. To achieve the Portfolio’s and the Series’ investment objectives, the Advisor implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Series’ design emphasizes long-term drivers of expected returns identified by the Advisor’s research, while balancing risk through broad diversification across companies and sectors. The Advisor’s portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Large Cap Value Series is designed to purchase a broad and diverse group of readily marketable securities of large U.S. companies that the Advisor determines to be value stocks. A company’s market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Series than companies with relatively lower market capitalizations. The Advisor may overweight certain stocks, including smaller companies, lower relative price stocks, and/or higher profitability stocks within the large-cap value segment of the U.S. market. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Large Cap Value Series will invest at least 80% of its net assets in securities of large cap U.S. companies. As of the date of this Prospectus, for purposes of the Series, the Advisor considers large cap companies to be companies whose market capitalizations are generally in the highest 90% of total market capitalization or companies whose market capitalizations are larger than or equal to the 1,000th largest U.S. company, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor’s market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a large cap company would be \$10,142 million or above. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. Large Cap Value Series’ exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company’s price momentum. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Large Cap Value Series and the U.S. Large Cap Value Portfolio each may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Series or Portfolio.

The U.S. Large Cap Value Series may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Large Cap Value Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Series to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Series to at times underperform equity funds that use other investment strategies.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Series and the Portfolio use derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Series may lose money and there may be a delay in recovering the loaned securities. The Series could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Large Cap Value Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market

performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensionalfund.com>.

The after-tax returns presented in the table for the U.S. Large Cap Value Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Large Cap Value Portfolio and the U.S. Large Cap Value Series. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.

- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Large Cap Value Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Large Cap Value Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Large Cap Value Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Small Cap Value Portfolio

Investment Objective

The investment objective of the U.S. Small Cap Value Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Small Cap Value Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.28%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.30%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.36% to 0.28% effective as of February 28, 2022.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Small Cap Value Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$31	\$97	\$169	\$381

PORTFOLIO TURNOVER

The U.S. Small Cap Value Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 22% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Small Cap Value Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Small Cap Value Portfolio, using a market capitalization weighted approach, is designed to purchase a broad and diverse group of the readily marketable securities of U.S. small cap companies that the Advisor determines to be value stocks. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations.

The U.S. Small Cap Value Portfolio may emphasize certain stocks, including smaller capitalization companies, lower relative price stocks, and/or higher profitability stocks as compared to their representation in the small-cap value segment of the U.S. market. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Small Cap Value Portfolio will invest at least 80% of its net assets in securities of small cap U.S. companies. As of the date of this Prospectus, for purposes of the Portfolio, the Advisor considers small cap companies to be companies whose market capitalizations are generally in the lowest 10% of total market capitalization or companies whose market capitalizations are smaller than the 1,000th largest U.S. company, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a small cap company would be below \$10,142 million. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. Small Cap Value Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Small Cap Value Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Small Cap Value Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Small Cap Value Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small Company Risk: Securities of small companies are often less liquid than those of large companies and this could make it difficult to sell a small company security at a desired time or price. As a result, small company stocks may fluctuate relatively more in price. In general, smaller capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Small Cap Value Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimension.com>.

The after-tax returns presented in the table for the U.S. Small Cap Value Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Small Cap Value Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Joel P. Schneider**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2015.
- **Marc C. Leblond**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2020.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Small Cap Value Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial

intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Small Cap Value Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Small Cap Value Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Targeted Value Portfolio

Investment Objective

The investment objective of the U.S. Targeted Value Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Targeted Value Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.27%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.29%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.30% to 0.27% effective as of February 28, 2022.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Targeted Value Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$30	\$93	\$163	\$368

PORTFOLIO TURNOVER

The U.S. Targeted Value Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 13% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Targeted Value Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification

across companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Targeted Value Portfolio, using a market capitalization weighted approach, is designed to purchase a broad and diverse group of the readily marketable securities of U.S. small and mid cap companies that the Advisor determines to be value stocks with higher profitability. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations. The Portfolio may emphasize certain stocks, including smaller capitalization companies, lower relative price stocks, and/or higher profitability stocks as compared to their representation in the small- and mid-cap value segment of the U.S. market. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Targeted Value Portfolio will invest at least 80% of its net assets in securities of U.S. companies. As of the date of this Prospectus, the Advisor considers for investment companies whose market capitalizations are generally smaller than the 500th largest U.S. company. As of December 31, 2021, companies smaller than the 500th largest U.S. company fall in the lowest 12% of total U.S. market capitalization. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Based on market capitalization data as of December 31, 2021, the market capitalization of a company smaller than the 500th largest U.S. company would be below \$13,929 million. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. Targeted Value Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Targeted Value Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Targeted Value Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Targeted Value Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small and Mid-Cap Company Risk: Securities of small and mid-cap companies are often less liquid than those of large companies and this could make it difficult to sell a small or mid-cap company security at a desired time or price. As a result, small and mid-cap company stocks may fluctuate relatively more in price. In general, small and mid-capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Targeted Value Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Joel P. Schneider**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2015.
- **Marc C. Leblond**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2020.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Targeted Value Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Targeted Value Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Targeted Value Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Core Equity 1 Portfolio

Investment Objective

The investment objective of the U.S. Core Equity 1 Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Core Equity 1 Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.12%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.14%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.14% to 0.12% effective as of February 28, 2021.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Core Equity 1 Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$14	\$45	\$79	\$179

PORTFOLIO TURNOVER

The U.S. Core Equity 1 Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 4% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Core Equity 1 Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of

expected returns identified by the Advisor's research, while balancing risk through broad diversification across companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Core Equity 1 Portfolio is designed to purchase a broad and diverse group of securities of U.S. companies. The Portfolio invests in companies of all sizes, with increased exposure to smaller capitalization, lower relative price, and higher profitability companies as compared to their representation in the U.S. Universe. The Advisor generally defines the U.S. Universe as a market capitalization weighted set (e.g., the larger the company, the greater the proportion of the U.S. Universe it represents) of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. The Portfolio's increased exposure to smaller capitalization, lower relative price, and higher profitability companies may be achieved by decreasing the allocation of the Portfolio's assets to larger capitalization, higher relative price, or lower profitability companies relative to their weight in the U.S. Universe. An equity issuer is considered to have a high relative price (i.e., a growth stock) primarily because it has a high price in relation to its book value. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, U.S. Core Equity 1 Portfolio will invest at least 80% of its net assets in equity securities of U.S. companies. The percentage allocation of the assets of the Portfolio to securities of the largest U.S. high relative price companies will generally be reduced from between 2.5% and 25% of their percentage weight in the U.S. Universe. For example, as of December 31, 2021, securities of the largest U.S. high relative price companies comprised 43% of the U.S. Universe and the Advisor allocated approximately 34% of the Portfolio to securities of the largest U.S. high relative price companies. The percentage by which the Portfolio's allocation to securities of the largest U.S. high relative price companies is reduced will change due to market movements.

The Advisor may also increase or reduce the U.S. Core Equity 1 Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Core Equity 1 Portfolio also may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Core Equity 1 Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Core Equity 1 Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small and Mid-Cap Company Risk: Securities of small and mid-cap companies are often less liquid than those of large companies and this could make it difficult to sell a small or mid-cap company security at a desired time or price. As a result, small and mid-cap company stocks may fluctuate relatively more in price. In general, small and mid-capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Core Equity 1 Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>.

The after-tax returns presented in the table for the U.S. Core Equity 1 Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition,

the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Core Equity 1 Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Core Equity 1 Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Core Equity 1 Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Core Equity 1 Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Core Equity 2 Portfolio

Investment Objective

The investment objective of the U.S. Core Equity 2 Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Core Equity 2 Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.16%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.19%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.17% to 0.16% effective as of February 28, 2021.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Core Equity 2 Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$19	\$61	\$107	\$243

PORTFOLIO TURNOVER

The U.S. Core Equity 2 Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 5% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Core Equity 2 Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across

companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Core Equity 2 Portfolio is designed to purchase a broad and diverse group of securities of U.S. companies. The Portfolio invests in companies of all sizes, with increased exposure to smaller capitalization, lower relative price and higher profitability companies as compared to their representation in the U.S. Universe. The Advisor generally defines the U.S. Universe as a market capitalization weighted set (e.g., the larger the company, the greater the proportion of the U.S. Universe it represents) of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. The Portfolio's increased exposure to smaller capitalization, lower relative price and higher profitability companies may be achieved by decreasing the allocation of the Portfolio's assets to larger capitalization, higher relative price, or lower profitability companies relative to their weight in the U.S. Universe. An equity issuer is considered to have a high relative price (i.e., a growth stock) primarily because it has a high price in relation to its book value. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, U.S. Core Equity 2 Portfolio will invest at least 80% of its net assets in equity securities of U.S. companies. The percentage allocation of the assets of the Portfolio to securities of the largest U.S. high relative price companies will generally be reduced from between 5% and 35% of their percentage weight in the U.S. Universe. For example, as of December 31, 2021, securities of the largest U.S. high relative price companies comprised 43% of the U.S. Universe and the Advisor allocated approximately 31% of the Portfolio to securities of the largest U.S. high relative price companies. The percentage by which the Portfolio's allocation to securities of the largest U.S. high relative price companies is reduced will change due to market movements.

The Advisor may also increase or reduce the U.S. Core Equity 2 Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Core Equity 2 Portfolio also may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Core Equity 2 Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Core Equity 2 Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small and Mid-Cap Company Risk: Securities of small and mid-cap companies are often less liquid than those of large companies and this could make it difficult to sell a small or mid cap company security at a desired time or price. As a result, small and mid-cap company stocks may fluctuate relatively more in price. In general, small and mid-capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Core Equity 2 Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>.

The after-tax returns presented in the table for the U.S. Core Equity 2 Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition,

the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Core Equity 2 Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Core Equity 2 Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Core Equity 2 Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Core Equity 2 Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Vector Equity Portfolio

Investment Objective

The investment objective of the U.S. Vector Equity Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Vector Equity Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.25%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.28%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.28% to 0.25% effective as of February 28, 2021.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Vector Equity Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$29	\$90	\$157	\$356

PORTFOLIO TURNOVER

The U.S. Vector Equity Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 10% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Vector Equity Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across

companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Vector Equity Portfolio is designed to purchase a broad and diverse group of securities of U.S. operating companies. The Portfolio invests in companies of all sizes, with increased exposure to smaller capitalization, lower relative price and higher profitability companies as compared to their representation in the U.S. Universe. The Advisor generally defines the U.S. Universe as a market capitalization weighted set (e.g., the larger the company, the greater the proportion of the U.S. Universe it represents) of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. The Portfolio's increased exposure to smaller capitalization, lower relative price and higher profitability companies may be achieved by decreasing the allocation of the Portfolio's assets to larger capitalization, higher relative price, or lower profitability companies relative to their weight in the U.S. Universe or by avoiding purchases in that segment of the market. An equity issuer is considered to have a high relative price (i.e., a growth stock) primarily because it has a high price in relation to its book value. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Vector Equity Portfolio will invest at least 80% of its net assets in equity securities of U.S. companies. The percentage allocation of the assets of the Portfolio to securities of the largest U.S. high relative price companies will generally be reduced from between 5% and 50% of their percentage weight in the U.S. Universe. For example, as of December 31, 2021, securities of the largest U.S. high relative price companies comprised 43% of the U.S. Universe and the Advisor allocated approximately 4% of the Portfolio to securities of the largest U.S. high relative price companies. The percentage by which the Portfolio's allocation to securities of the largest U.S. high relative price companies is reduced will change due to market movements and other factors.

The Advisor may also increase or reduce the U.S. Vector Equity Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Vector Equity Portfolio also may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Vector Equity Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Vector Equity Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small and Mid-Cap Company Risk: Securities of small and mid-cap companies are often less liquid than those of large companies and this could make it difficult to sell a small or mid-cap company security at a desired time or price. As a result, small and mid-cap company stocks may fluctuate relatively more in price. In general, small and mid-capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Vector Equity Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. - **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Vector Equity Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167.

Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Vector Equity Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Vector Equity Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Small Cap Portfolio

Investment Objective

The investment objective of the U.S. Small Cap Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Small Cap Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.25%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.27%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.30% to 0.25% effective as of February 28, 2022.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Small Cap Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$28	\$87	\$152	\$343

PORTFOLIO TURNOVER

The U.S. Small Cap Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 12% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Small Cap Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across

companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Small Cap Portfolio, using a market capitalization weighted approach, is designed to purchase a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations. The Portfolio may emphasize certain stocks, including smaller capitalization companies, lower relative price stocks, and/or higher profitability stocks as compared to their representation in the small-cap segment of the U.S. market. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Small Cap Portfolio will invest at least 80% of its net assets in securities of small cap U.S. companies. As of the date of this Prospectus, for purposes of the Portfolio, the Advisor considers small cap companies to be companies whose market capitalizations are generally in the lowest 10% of total market capitalization or companies whose market capitalizations are smaller than the 1,000th largest U.S. company, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a small cap company would be below \$10,142 million. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. Small Cap Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Small Cap Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Small Cap Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Small Cap Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small Company Risk: Securities of small companies are often less liquid than those of large companies and this could make it difficult to sell a small company security at a desired time or price. As a result, small company stocks may fluctuate relatively more in price. In general, smaller capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Small Cap Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>.

The after-tax returns presented in the table for the U.S. Small Cap Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Small Cap Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Joel P. Schneider**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2015.
- **Marc C. Leblond**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2020.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Small Cap Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Small Cap Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Small Cap Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. Micro Cap Portfolio

Investment Objective

The investment objective of the U.S. Micro Cap Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. Micro Cap Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.38%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.41%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.41% to 0.38% effective as of February 28, 2022.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. Micro Cap Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$42	\$132	\$230	\$518

PORTFOLIO TURNOVER

The U.S. Micro Cap Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 20% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. Micro Cap Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across

companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. Micro Cap Portfolio, using a market capitalization weighted approach, is designed to purchase a broad and diverse group of the securities of U.S. micro cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations. The Portfolio may emphasize certain stocks, including smaller capitalization companies, lower relative price stocks, and/or higher profitability stocks as compared to their representation in the micro-cap segment of the U.S. market. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. Micro Cap Portfolio will invest at least 80% of its net assets in securities of U.S. micro cap companies. As of the date of this Prospectus, for the purposes of the Portfolio, the Advisor considers micro cap companies to be companies whose market capitalizations are generally in the lowest 5% of total market capitalization or companies whose market capitalizations are smaller than the 1,500th largest U.S. company, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a micro cap company would be below \$4,554 million. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. Micro Cap Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum and investment characteristics. In assessing a company's investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing a company's investment characteristics are subject to change from time to time. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. Micro Cap Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. Micro Cap Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. Micro Cap Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Small Company Risk: Securities of small companies are often less liquid than those of large companies and this could make it difficult to sell a small company security at a desired time or price. As a result, small company stocks may fluctuate relatively more in price. In general, smaller capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the U.S. Micro Cap Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>.

The after-tax returns presented in the table for the U.S. Micro Cap Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition,

the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. Micro Cap Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **Joel P. Schneider**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2015.
- **Marc C. Leblond**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2020.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. Micro Cap Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. Micro Cap Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. Micro Cap Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

U.S. High Relative Profitability Portfolio

Investment Objective

The investment objective of the U.S. High Relative Profitability Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the U.S. High Relative Profitability Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.19%
Other Expenses	0.04%
Total Annual Fund Operating Expenses	0.23%

* The "Management Fee" and "Total Annual Fund Operating Expenses" have been adjusted to reflect the decrease in the management fee payable by the Portfolio from 0.20% to 0.19% effective as of February 28, 2022.

EXAMPLE

This Example is meant to help you compare the cost of investing in the U.S. High Relative Profitability Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$24	\$74	\$130	\$293

PORTFOLIO TURNOVER

A mutual fund generally pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when mutual fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the U.S. High Relative Profitability Portfolio's portfolio turnover rate was 12% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the U.S. High Relative Profitability Portfolio's investment objective, Dimensional Fund Advisors LP (the "Advisor") implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions. As further described below, the Portfolio's design emphasizes long-term drivers of expected returns identified by the Advisor's research, while balancing risk through broad diversification across companies and sectors. The Advisor's portfolio management and trading processes further balance those long-term drivers of expected returns with shorter-term drivers of expected returns and trading costs.

The U.S. High Relative Profitability Portfolio is designed to purchase a broad and diverse group of readily marketable securities of large U.S. companies that the Advisor determines to have high profitability relative to other U.S. large cap companies at the time of purchase. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The Portfolio may emphasize certain stocks, including smaller capitalization companies, lower relative price stocks, and/or higher profitability stocks as compared to their representation in the large-cap high profitability segment of the U.S. market. The Portfolio's increased exposure to such stocks may be achieved by overweighting and/or underweighting eligible stocks based on their market capitalization, relative price, and/or profitability characteristics. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. High Relative Profitability Portfolio will invest at least 80% of its net assets in securities of U.S. companies. As of the date of this Prospectus, for purposes of the Portfolio, the Advisor considers large cap companies to be companies whose market capitalizations are generally in the highest 90% of total market capitalization or companies whose market capitalizations are larger than or equal to the 1,000th largest U.S. company, whichever results in the higher market capitalization break. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a large cap company would be \$10,142 million or above. This threshold will change due to market conditions.

The Advisor may also increase or reduce the U.S. High Relative Profitability Portfolio's exposure to an eligible company, or exclude a company, based on shorter-term considerations, such as a company's price momentum. In addition, the Advisor seeks to reduce trading costs using a flexible trading approach that looks for opportunities to participate in the available market liquidity, while managing turnover and explicit transaction costs.

The U.S. High Relative Profitability Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio. The Portfolio may invest in exchange-traded funds ("ETFs") for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity.

The U.S. High Relative Profitability Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the U.S. High Relative Profitability Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other

investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the U.S. High Relative Profitability Portfolio. The following individuals are responsible for leading the day-to-day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since inception (2017).
- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the U.S. High Relative Profitability Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the U.S. High Relative Profitability Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account.

Payments to Financial Intermediaries

If you purchase the U.S. High Relative Profitability Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

DFA Real Estate Securities Portfolio

Investment Objective

The investment objective of the DFA Real Estate Securities Portfolio (the "Portfolio") is to achieve long-term capital appreciation.

Fees and Expenses of the Portfolio

This table describes the fees and expenses you may pay if you buy, hold or sell shares of the DFA Real Estate Securities Portfolio. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.17%
Other Expenses	0.03%
Total Annual Fund Operating Expenses	0.20%
Fee Waiver and/or Expense Reimbursement*	0.02%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.18%

* Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees and in certain instances, assume certain expenses of the DFA Real Estate Securities Portfolio. The Fee Waiver and Expense Assumption Agreement for the Portfolio will remain in effect through February 28, 2023, and may only be terminated by the Fund's Board of Directors prior to that date. The Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed up to thirty-six months after such fee waiver and/or expense assumption.

EXAMPLE

This Example is meant to help you compare the cost of investing in the DFA Real Estate Securities Portfolio with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Portfolio for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Portfolio's operating expenses remain the same. The costs for the Portfolio reflect the net expenses of the Portfolio that result from the contractual expense waiver in the first year only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$18	\$62	\$111	\$253

PORTFOLIO TURNOVER

The DFA Real Estate Securities Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 5% of the average value of its investment portfolio.

Principal Investment Strategies

To achieve the DFA Real Estate Securities Portfolio's investment objective, the Advisor implements an integrated investment approach that combines research, portfolio design, portfolio management, and trading functions.

The DFA Real Estate Securities Portfolio, using a market capitalization weighted approach, purchases readily marketable equity securities of companies whose principal activities include ownership, management, development, construction, or sale of residential, commercial or industrial real estate. The Portfolio will principally invest in equity securities of companies in certain real estate investment trusts ("REITs") and companies engaged in residential construction and firms, except partnerships, whose principal business is to develop commercial property. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations. The Advisor may adjust the representation in the Portfolio of an eligible company, or exclude a company, after considering such factors as free float, momentum, trading strategies, liquidity, size, relative price, profitability, and other factors that the Advisor determines to be appropriate. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, at least 80% of the DFA Real Estate Securities Portfolio's net assets will be invested in securities of companies in the real estate industry. The Portfolio generally considers a company to be principally engaged in the real estate industry if the company (i) derives at least 50% of its revenue or profits from the ownership, management, development, construction, or sale of residential, commercial, industrial, or other real estate; (ii) has at least 50% of the value of its assets invested in residential, commercial, industrial, or other real estate; or (iii) is organized as a REIT or REIT-like entity. REITs and REIT-like entities are types of real estate companies that pool investors' funds for investment primarily in income producing real estate or real estate related loans or interests. The Portfolio will make equity investments in securities listed on a securities exchange in the United States that is deemed appropriate by the Advisor.

The DFA Real Estate Securities Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The DFA Real Estate Securities Portfolio may lend its portfolio securities to generate additional income.

Principal Risks

Because the value of your investment in the DFA Real Estate Securities Portfolio will fluctuate, there is the risk that you will lose money. An investment in the Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolio.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Risks of Concentrating in the Real Estate Industry: The Portfolio is concentrated in the real estate industry. The exclusive focus by Portfolio on the real estate industry will cause the Portfolio to be exposed to the general risks of direct real estate ownership. The value of securities in the real estate industry can be affected by changes in real estate values and rental income, property taxes, and tax and regulatory requirements. Also, the value of

securities in the real estate industry may decline with changes in interest rates. Investing in REITs and REIT-like entities involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs and REIT-like entities are dependent upon management skill, may not be diversified, and are subject to heavy cash flow dependency and self-liquidation. REITs and REIT-like entities also are subject to the possibility of failing to qualify for tax free pass-through of income. Also, because REITs and REIT-like entities typically are invested in a limited number of projects or in a particular market segment, these entities are more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments. The performance of Portfolio may be materially different from the broad equity market.

Derivatives Risk: Derivatives are instruments, such as futures contracts, and options thereon, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivative instruments are subject to a number of risks including counterparty, liquidity, interest rate, market, credit and management risks, as well as the risk of improper valuation. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio may lose money and there may be a delay in recovering the loaned securities. The Portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Performance

The bar chart and table immediately following illustrate the variability of the DFA Real Estate Securities Portfolio's returns and are meant to provide some indication of the risks of investing in the Portfolio. The bar chart shows the changes in the Portfolio's performance from year to year. The table illustrates how annualized one year, five year and ten year returns, both before and after taxes, compare with those of a broad measure of market performance. The Portfolio's past performance (before and after taxes) is not an indication of future results. Updated performance information for the Portfolio can be obtained by visiting <http://us.dimensional.com>. The secondary index in the table shows how the Portfolio's performance compares to a group of securities that aligns more closely with the Portfolio's investment strategies.

The after-tax returns presented in the table for the DFA Real Estate Securities Portfolio are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown in the table. In addition, the after-tax returns shown are not relevant to investors who hold shares of the Portfolio through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts.

DFA Real Estate Securities Portfolio Institutional Class Shares—Total Returns

January 2012-December 2021

Highest Quarter

⁽²⁾ As of the date of this Prospectus, the DFA Real Estate Securities Portfolio has changed its primary benchmark to the Dow Jones U.S. Select REIT Index because this index better reflects the universe of securities in which the Portfolio invests.

Investment Advisor/Portfolio Management

Dimensional Fund Advisors LP serves as the investment advisor for the DFA Real Estate Securities Portfolio. The following individuals are responsible for leading the day to day management of the Portfolio:

- **Jed S. Fogdall**, Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2012.
- **John A. Hertzner**, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.
- **Mary T. Phillips**, Deputy Head of Portfolio Management, North America, member of the Investment Committee, Vice President and Senior Portfolio Manager of the Advisor, has been a portfolio manager of the Portfolio since 2022.

Purchase and Redemption of Fund Shares

Investors may purchase or redeem shares of the DFA Real Estate Securities Portfolio on each day that the NYSE is scheduled to be open for business by first contacting the Portfolio's transfer agent at (888) 576-1167. Shareholders that invest in the Portfolio through a financial intermediary should contact their financial intermediary regarding purchase and redemption procedures. The Portfolio generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Advisor. All investments are subject to approval of the Advisor.

Tax Information

The dividends and distributions you receive from the DFA Real Estate Securities Portfolio are taxable and generally will be taxed as ordinary income, capital gains, or some combination of both, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, in which case distributions may be taxed as ordinary income when withdrawn from the plan or account. See **"Dividends, Capital Gains Distributions and Taxes—Tax Considerations"** in the Portfolio's Prospectus for special tax considerations with respect to the Portfolio.

Payments to Financial Intermediaries

If you purchase the DFA Real Estate Securities Portfolio through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of the Portfolio shares and/or related services. These payments may create a conflict of interest by influencing the financial intermediary to recommend the Portfolio over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Additional Information on Investment Objectives and Policies

The two registrants described in this Prospectus offer a variety of investment portfolios. Each of the registrants' Portfolios has its own investment objective and policies, and is the equivalent of a separate mutual fund. The U.S. Large Company Portfolio is offered by Dimensional Investment Group Inc. The other Portfolios contained in this Prospectus are offered by DFA Investment Dimensions Group Inc. The Portfolios described in this Prospectus are designed for long-term investors. The U.S. Targeted Value Portfolio also offers two additional classes of shares, Class R1 shares and Class R2 shares.

Investment Terms Used in the Prospectus

Below are the definitions of some terms that the Advisor uses to describe the investment strategies for certain Portfolios.

Free Float generally describes the number of publicly traded shares of a company.

Momentum generally describes the past performance of a stock relative to other stocks.

Trading Strategies generally refers to the ability to execute purchases and sales of stocks in a cost-effective manner.

Profitability generally measures a company's profit in relation to its book value or assets.

U.S. Large Company Portfolio

U.S. Large Company Portfolio seeks, as its investment objective, to approximate the total investment return of the S&P 500[®] Index. The U.S. Large Company Portfolio generally invests in the stocks that comprise the S&P 500[®] Index in approximately the proportions they are represented in the S&P 500[®] Index.

Ordinarily, portfolio companies will not be sold except to reflect additions or deletions of the companies that comprise the S&P 500[®] Index, including as a result of mergers, reorganizations and similar transactions and, to the extent necessary, to provide cash to pay redemptions of the U.S. Large Company Portfolio's shares.

The U.S. Large Company Portfolio may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, the U.S. Large Company Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

For information concerning S&P Global Ratings, a division of The McGraw Hill Companies ("S&P"), and disclaimers of S&P with respect to the U.S. Large Company Portfolio, see "**Standard & Poor's—Information and Disclaimers.**"

Enhanced U.S. Large Company Portfolio

Enhanced U.S. Large Company Portfolio seeks, as its investment objective, to achieve a total return which exceeds the total return performance of the S&P 500[®] Index. The Portfolio may invest in all of the stocks represented in the S&P 500[®] Index, options on stock indices, stock index futures, options on stock index futures, swap agreements on stock indices and shares of investment companies, such as exchange-traded funds (ETFs), that invest in stocks represented in the S&P 500[®] Index or other similar stock indices. The Portfolio generally invests in S&P 500[®] futures contracts and fixed income obligations. The Portfolio may, from time to time, also invest in options on stock indices, stock index futures, options on stock index futures and swap agreements based on indices other than, but similar to, the S&P 500[®] Index (such instruments whether or not based on the S&P 500[®] Index hereinafter collectively referred to as "Index Derivatives"). For information concerning S&P, and

disclaimers of S&P with respect to the Enhanced U.S. Large Company Portfolio, see “**Standard & Poor’s—Information and Disclaimers.**”

The Enhanced U.S. Large Company Portfolio may invest a substantial portion of its assets in Index Derivatives. Assets of the Portfolio may be invested in fixed income obligations including:

1. *U.S. Government Obligations*—Debt securities issued by the U.S. Treasury that are direct obligations of the U.S. Government, including bills, notes and bonds. These securities may also be purchased on a “when-issued” basis.
2. *U.S. Government Agency Obligations*—Issued or guaranteed by U.S. government-sponsored instrumentalities and federal agencies, which have different levels of credit support. The U.S. government agency obligations include, but are not limited to, securities issued by agencies and instrumentalities of the U.S. Government that are supported by the full faith and credit of the United States, such as the Federal Housing Administration and Ginnie Mae, including Ginnie Mae mortgage pass-through securities. Other securities issued by agencies and instrumentalities sponsored by the U.S. Government may be supported only by the issuer’s right to borrow from the U.S. Treasury, subject to certain limits, such as securities issued by Federal Home Loan Banks, or are supported only by the credit of such agencies, such as Freddie Mac and Fannie Mae, including their mortgage pass-through securities. These securities may also be purchased on a “when-issued” or “to-be-announced” basis, such as mortgage TBAs.
3. *Corporate Debt Obligations*—Corporate debt securities (e.g., bonds and debentures), which have received an investment grade rating by Moody’s Investors Service, Inc. (“Moody’s”), S&P Global Ratings (“S&P”), or Fitch Ratings Ltd. (“Fitch”), or an equivalent rating assigned by another nationally recognized statistical rating organization (“NRSRO”), or, if unrated, have been determined by the Advisor to be of comparable quality.
4. *Bank Obligations*—Obligations of U.S. banks and savings and loan associations and dollar-denominated obligations of U.S. subsidiaries and branches of foreign banks, such as certificates of deposit (including marketable variable rate certificates of deposit), time deposits, and bankers’ acceptances. Bank certificates of deposit will be acquired only from banks having assets in excess of \$1,000,000,000.
5. *Commercial Paper*—Rated, at the time of purchase, A3 or better by S&P or Prime3 or better by Moody’s, or F3 or better by Fitch, or an equivalent rating assigned by another NRSRO, or, if unrated, issued by a corporation having an outstanding unsecured debt issue rated at least Baa3 by Moody’s or BBB- by S&P or Fitch.
6. *Repurchase Agreements*—Instruments through which the Portfolio purchases securities (“underlying securities”) from a bank, a registered U.S. government securities dealer, or such other counterparties with creditworthiness and other characteristics deemed appropriate by the Advisor, with an agreement by the seller to repurchase the securities at an agreed price, plus interest at a specified rate. The underlying securities will be limited to U.S. government and agency obligations described in (1) and (2) above. The Enhanced U.S. Large Company Portfolio will not enter into a repurchase agreement with a duration of more than seven days if, as a result, more than 10% of the value of the Enhanced U.S. Large Company Portfolio’s total assets would be so invested. In addition, a repurchase agreement with a duration of more than seven days will be subject to the Portfolio’s investment restriction on illiquid investments. The Enhanced U.S. Large Company Portfolio also will only invest in repurchase agreements with banks, U.S. government securities dealers, and/or other counterparties, as described above, that are approved by the Investment Committee of the Advisor. The Advisor will monitor the market value of the securities plus any accrued interest thereon so that they will at least equal the repurchase price.
7. *Foreign Government and Agency Obligations*—Bills, notes, bonds, and other debt securities issued or guaranteed by foreign governments, or their authorities, agencies, instrumentalities or political subdivisions.
8. *Supranational Organization Obligations*—Debt securities of supranational organizations such as the European Investment Bank, the Inter-American Development Bank or the World Bank, which are chartered to promote economic development.
9. *Foreign Issuer Obligations*—Debt securities of non-U.S. issuers rated AA- or better by S&P or Fitch, Aa3 or better by Moody’s, or an equivalent rating assigned by another NRSRO, or, if unrated, securities that have been determined by the Advisor to be of comparable quality.
10. *Eurodollar Obligations*—Debt securities of domestic or foreign issuers denominated in U.S. dollars but not trading in the United States.

11. *Money Market Funds*—The Enhanced U.S. Large Company Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds. Investments in money market funds may involve a duplication of certain fees and expenses.

The categories of investments that may be acquired by the Enhanced U.S. Large Company Portfolio may include both fixed and floating rate securities. Floating rate securities bear interest at rates that vary with prevailing market rates. Interest rate adjustments are made periodically (e.g., every six months), usually based on a money market index such as the Secured Overnight Financing Rate (SOFR) or the Treasury bill rate.

The percentage of assets of the Enhanced U.S. Large Company Portfolio that will be invested in S&P 500® Index stocks, Index Derivatives, fixed income investments and in shares of other investment companies may vary from time to time, within the discretion of the Advisor and according to restraints imposed by the federal securities laws and regulations governing mutual funds. The Enhanced U.S. Large Company Portfolio will maintain a segregated account consisting of liquid assets (or, as permitted by applicable interpretations of the Securities and Exchange Commission (the "SEC"), enter into offsetting positions) to cover its open positions in Index Derivatives to avoid leveraging by the Portfolio.

The Enhanced U.S. Large Company Portfolio will enter into positions in futures and options on futures only to the extent such positions are permissible with respect to applicable rules of the Commodity Futures Trading Commission without registering the Portfolio as a commodity pool operator. In addition, the Portfolio may not be able to utilize Index Derivatives to the extent otherwise permissible or desirable because of constraints imposed by the Internal Revenue Code of 1986, as amended (the "Code"), or by unanticipated illiquidity in the marketplace for such instruments.

To the extent the Enhanced U.S. Large Company Portfolio's investments in over-the-counter options are determined to be illiquid, the Portfolio will invest in such options only to the extent consistent with its 15% limit on illiquid investments.

The Enhanced U.S. Large Company Portfolio may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. equity markets, while maintaining liquidity. In addition to money market instruments and other short-term investments, the Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. The Portfolio's investments in the securities of other investment companies, including ETFs and money market funds, may involve the duplication of certain fees and expenses.

Standard & Poor's—Information and Disclaimers. The U.S. Large Company Portfolio and the Enhanced U.S. Large Company Portfolio are not sponsored, endorsed, sold or promoted by S&P. S&P makes no representation or warranty, express or implied, to the owners of the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio or any member of the public regarding the advisability of investing in securities generally or in the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio particularly or the ability of the S&P 500® Index to track general stock market performance. S&P's only relationship to the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio is the licensing of certain trademarks and trade names of S&P and of the S&P 500® Index which is determined, composed and calculated by S&P without regard to the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio. S&P has no obligation to take the needs of the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio or their respective owners into consideration in determining, composing or calculating the S&P 500® Index. S&P is not responsible for and has not participated in the determination of the prices and amount of the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio or the issuance or sale of the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio or in the determination or calculation of the equation by which the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing or trading of the U.S. Large Company Portfolio or the Enhanced U.S. Large Company Portfolio.

S&P DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE S&P 500® INDEX OR ANY DATA INCLUDED THEREIN AND S&P SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR

INTERRUPTIONS THEREIN. S&P MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE PRODUCT, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE S&P 500® INDEX OR ANY DATA INCLUDED THEREIN. S&P MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE S&P 500® INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL S&P HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

U.S. Large Cap Equity Portfolio

The investment objective of the U.S. Large Cap Equity Portfolio is to achieve long-term capital appreciation. Ordinarily, the U.S. Large Cap Equity Portfolio purchases a broad and diverse group of readily marketable securities of U.S. companies that the Advisor determines to be large capitalization companies within the U.S. Universe. The Advisor generally defines the U.S. Universe as a market capitalization weighted set of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Market capitalization weighted means that a company's weighting in the U.S. Universe is proportional to that company's actual market capitalization compared to the total market capitalization of all eligible companies. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the Portfolio than companies with relatively lower market capitalizations. In addition, the Advisor may consider a company's size, relative price, and/or profitability relative to other eligible companies when making investment decisions for the U.S. Large Cap Equity Portfolio. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time. The Advisor may also adjust the representation in the U.S. Large Cap Equity Portfolio of an eligible company, or exclude a company, after considering such factors as free float, momentum, trading strategies, liquidity, size, relative price, profitability, and other factors that the Advisor determines to be appropriate.

On not less than a semi-annual basis, the Advisor reviews total market capitalization to determine those companies whose stock may be eligible for investment. Generally, the U.S. Large Cap Equity Portfolio does not intend to purchase or sell securities based on the prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase. The Portfolio may sell portfolio securities when the issuer's market capitalization falls below that of the issuer with the minimum market capitalization that is then eligible for purchase by the Portfolio.

The total market capitalization range used by the Advisor for the U.S. Large Cap Equity Portfolio, as described above, generally applies at the time of purchase. The Portfolio is not required to dispose of a security if the security's issuer is no longer within the total market capitalization range criteria. Securities that do meet the market capitalization criteria nevertheless may be sold at any time when, in the Advisor's judgment, circumstances warrant their sale. See "**Portfolio Transactions—All Portfolios.**"

The U.S. Large Cap Equity Portfolio may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, the Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

U.S. Large Cap Value Portfolio

U.S. Small Cap Value Portfolio

U.S. Targeted Value Portfolio

The investment objective of each of the U.S. Large Cap Value Portfolio, U.S. Small Cap Value Portfolio and the U.S. Targeted Value Portfolio (the "U.S. Value Portfolios") is to achieve long-term capital appreciation. The U.S.

Large Cap Value Portfolio is a "Feeder Portfolio," which is a Portfolio that does not generally buy individual securities directly. Instead, it invests in a corresponding fund, or "Master Fund," that in turn purchases stocks and other securities. The U.S. Large Cap Value Portfolio pursues its investment objectives by investing substantially all of its assets in its corresponding Master Fund, The U.S. Large Cap Value Series (the "Large Cap Value Series") of The DFA Investment Trust Company (the "Trust"), which has the same investment objective and policies as the U.S. Large Cap Value Portfolio. The U.S. Targeted Value Portfolio and the U.S. Small Cap Value Portfolio generally will pursue their investment objective by investing directly in securities of U.S. companies. Ordinarily, each of the Large Cap Value Series and the U.S. Small Cap Value Portfolio will invest its assets in a broad and diverse group of readily marketable securities of U.S. companies which the Advisor determines to be value stocks at the time of purchase. The U.S. Targeted Value Portfolio invests its assets in a broad and diverse group of readily marketable securities of U.S. companies that the Advisor determines to be value stocks with higher profitability at the time of purchase. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value (a "price to book ratio"). In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

With respect to the U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio, the Advisor may consider a small capitalization company's investment characteristics as compared to other eligible companies when making investment decisions and may exclude a small capitalization company with high investment as measured by the company's recent asset growth. A Portfolio will generally not exclude more than 5% of the eligible U.S. small capitalization company universe based on such investment characteristics. The criteria the Advisor uses for assessing investment characteristics are subject to change from time to time. The Advisor may decrease the amount that a Portfolio invests in eligible small capitalization companies that have lower profitability and/or higher relative prices.

The Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio will purchase securities that are listed on the U.S. national securities exchanges. Each of the U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio uses a market capitalization weighted approach. See "**Market Capitalization Weighted Approach**" in this Prospectus.

On not less than a semi-annual basis, for each of the Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio, the Advisor calculates price to book ratios and reviews total market capitalization to determine those companies whose stock may be eligible for investment.

Generally, the Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio do not intend to purchase or sell securities based on the prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase.

The Large Cap Value Series may sell portfolio securities when the issuer's market capitalization falls below that of the issuer with the minimum market capitalization that is then eligible for purchase by that Series. Each of the U.S. Targeted Value Portfolio and the U.S. Small Cap Value Portfolio may sell portfolio securities when the issuer's market capitalization increases to a level that exceeds that of the issuer with the largest market capitalization that is then eligible for investment by that Portfolio.

In addition, the Large Cap Value Series may sell portfolio securities when their price to book ratios rise above those of the security with the highest such ratio that is then eligible for purchase by that Series. The U.S. Targeted Value Portfolio and the U.S. Small Cap Value Portfolio may also sell portfolio securities in the same circumstances, however, each of these funds may retain securities of issuers with relatively smaller market capitalizations for longer periods, despite a decrease in the issuers' price to book ratios.

The total market capitalization ranges, and the value criteria used by the Advisor for the Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio, as described above, generally apply at the time of purchase by the Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio. The Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio are not required to

dispose of a security if the security's issuer is no longer within the total market capitalization range or does not meet current value criteria. Securities that do meet the market capitalization and/or value criteria nevertheless may be sold at any time when, in the Advisor's judgment, circumstances warrant their sale. See "**Portfolio Transactions—All Portfolios**" in this Prospectus.

The Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio each may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, the Large Cap Value Series, U.S. Small Cap Value Portfolio and U.S. Targeted Value Portfolio each may invest in affiliated and unaffiliated registered and unregistered money market funds to manage cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

U.S. Core Equity 1 Portfolio

U.S. Core Equity 2 Portfolio

U.S. Vector Equity Portfolio

The investment objective of the U.S. Core Equity 1 Portfolio, the U.S. Core Equity 2 Portfolio (the "U.S. Core Portfolios") and U.S. Vector Equity Portfolio is to achieve long-term capital appreciation.

The U.S. Core Equity 1 Portfolio, the U.S. Core Equity 2 Portfolio and the U.S. Vector Equity Portfolio each seeks to achieve its investment objective by purchasing a broad and diverse group of securities of U.S. companies. Each Portfolio invests in companies of all sizes, with increased exposure to smaller capitalization, lower relative price, and higher profitability companies relative to the U.S. Universe. While both U.S. Core Portfolios seek increased exposure to smaller capitalization, lower relative price, and higher profitability companies, U.S. Core Equity 2 Portfolio's emphasis on smaller capitalization, lower relative price, and higher profitability companies is greater than that of U.S. Core Equity 1 Portfolio. The U.S. Core Portfolios and the U.S. Vector Equity Portfolio will purchase securities within the U.S. Universe, which the Advisor generally defines as a market capitalization weighted set of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor (U.S. Universe). Market capitalization weighted means that a company's weighting in the U.S. Universe is proportional to that company's actual market capitalization compared to the total market capitalization of all eligible companies. The higher the company's relative market capitalization, the greater its representation. Increased exposure to smaller capitalization, lower relative price, and higher profitability companies may be achieved by decreasing the allocation of a Portfolio's assets to larger capitalization, higher relative price or lower profitability companies relative to their weight in the U.S. Universe. Additionally, for the U.S. Vector Equity Portfolio, increased exposure to smaller capitalization and lower relative price companies may be achieved by avoiding purchases in that segment of the market represented by the largest U.S. high relative price companies. An equity issuer is considered to have a high relative price (i.e., a growth stock) primarily because it has a high price in relation to its book value. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. The Advisor may also adjust the representation in the U.S. Core Portfolios or the U.S. Vector Equity Portfolio of an eligible company, or exclude a company, after considering such factors as free float, momentum, trading strategies, liquidity, size, relative price, profitability, investment characteristics, and other factors that the Advisor determines to be appropriate. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

The Advisor may consider a small capitalization company's investment characteristics as compared to other eligible companies when making investment decisions and may exclude a small capitalization company with high investment as measured by the company's recent asset growth. A Portfolio will generally not exclude more than 5% of the eligible U.S. small capitalization company universe based on such investment characteristics. The criteria the Advisor uses for assessing investment characteristics are subject to change from time to time. The Advisor may decrease the amount that a Portfolio invests in eligible small capitalization companies that have lower profitability and/or higher relative prices.

The U.S. Core Portfolios and U.S. Vector Equity Portfolio each may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, each Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage the Portfolio's cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

U.S. Small Cap Portfolio

U.S. Micro Cap Portfolio

Each of the U.S. Small Cap Portfolio and the U.S. Micro Cap Portfolio (the "U.S. Small Company Portfolios") has an investment objective to achieve long-term capital appreciation. The U.S. Small Company Portfolios provide investors with access to securities portfolios consisting of small U.S. companies (micro capitalization companies for the U.S. Micro Cap Portfolio). Company size will be determined for purposes of the U.S. Small Company Portfolios on the basis of a company's market capitalization, which will be calculated by multiplying the price of a company's stock by the number of its shares of outstanding common stock.

As of the date of this Prospectus, for purposes of the U.S. Small Cap Portfolio, the Advisor considers small cap companies to be companies whose market capitalizations are generally in the lowest 10% of total market capitalization or companies whose market capitalizations are smaller than the 1,000th largest U.S. company, whichever results in the higher market capitalization break. The U.S. Small Cap Portfolio also may purchase securities of foreign issuers that are traded in the U.S. securities markets, but such investments may not exceed 5% of the gross assets of the Portfolio. Generally, it is the intention of the Portfolio to purchase securities of eligible companies using a market capitalization weighted approach. See "**Portfolio Construction—U.S. Small Company Portfolios.**"

As of the date of this Prospectus, for purposes of the U.S. Micro Cap Portfolio, the Advisor considers micro cap companies to be companies whose market capitalizations are generally in the lowest 5% of total market capitalization or companies whose market capitalizations are smaller than the 1,500th largest U.S. company, whichever results in the higher market capitalization break. The U.S. Micro Cap Portfolio may purchase securities of foreign issuers which are traded in the U.S. securities markets, but such investments may not exceed 5% of the gross assets of the Portfolio. There is some overlap in the companies in which the U.S. Micro Cap Portfolio and the U.S. Small Cap Portfolio invest. Generally, it is the intention of the Portfolio to purchase the stock of eligible companies using a market capitalization weighted approach. See "**Portfolio Construction—U.S. Small Company Portfolios.**"

The Advisor may consider a small capitalization company's investment characteristics as compared to other eligible companies when making investment decisions and may exclude a small capitalization company with high investment as measured by the company's recent asset growth. A Portfolio will generally not exclude more than 5% of the eligible U.S. small capitalization company universe based on such investment characteristics. The criteria the Advisor uses for assessing investment characteristics are subject to change from time to time. The Advisor may decrease the amount that a Portfolio invests in eligible small capitalization companies (micro capitalization companies for the U.S. Micro Cap Portfolio) that have lower profitability and/or higher relative prices.

For the discussion of portfolio construction and portfolio transactions for the U.S. Small Company Portfolios, see "**Portfolio Construction—U.S. Small Company Portfolios.**"

Each U.S. Small Company Portfolio may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, each U.S. Small Company Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage the Portfolio's cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

U.S. High Relative Profitability Portfolio

The investment objective of the U.S. High Relative Profitability Portfolio is to achieve long-term capital appreciation. The U.S. High Relative Profitability Portfolio purchases a broad and diverse group of readily marketable securities of large U.S. companies that the Advisor determines to have high profitability relative to other U.S. large cap companies at the time of purchase. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. Generally, the Advisor expects to consider such factors as market capitalization, free float (adjustments for ownership by insiders and other shareholders deemed to be holding strategic positions in the company), size, relative price, profitability, momentum (the past performance of the shares of the company), trading strategies (the Advisor's ability to trade the company shares efficiently), liquidity management and other factors that the Advisor determines to be appropriate, to determine the representation of an eligible company in the Portfolio. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. The criteria the Advisor uses for assessing relative price and profitability are subject to change from time to time.

As a non-fundamental policy, under normal circumstances, the U.S. High Relative Profitability Portfolio will invest at least 80% of its net assets in securities of U.S. companies. As of the date of this Prospectus, for purposes of the U.S. High Relative Profitability Portfolio, the Advisor considers large cap companies to be companies whose market capitalizations are generally in the highest 90% of total market capitalization or companies whose market capitalizations are larger than or equal to the 1,000th largest U.S. company, whichever results in the higher market capitalization break. A company's market capitalization is the number of its shares outstanding times its price per share. Total market capitalization is based on the market capitalization of eligible U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor. Under the Advisor's market capitalization guidelines described above, based on market capitalization data as of December 31, 2021, the market capitalization of a large cap company would be \$10,142 million or above. This threshold will change due to market conditions.

On not less than a semi-annual basis, the Advisor reviews total market capitalization to determine those companies whose stock may be eligible for investment. Generally, the U.S. High Relative Profitability Portfolio does not intend to purchase or sell securities based on the prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase. The Portfolio may sell portfolio securities when the issuer's market capitalization falls below that of the issuer with the minimum market capitalization that is then eligible for purchase by the Portfolio.

The total market capitalization range used by the Advisor for the U.S. High Relative Profitability Portfolio, as described above, generally applies at the time of purchase. The Portfolio is not required to dispose of a security if the security's issuer is no longer within the total market capitalization range criteria. Securities that do meet the market capitalization criteria nevertheless may be sold at any time when, in the Advisor's judgment, circumstances warrant their sale. See "**Portfolio Transactions—All Portfolios.**"

The U.S. High Relative Profitability Portfolio may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

The U.S. High Relative Profitability Portfolio may invest in ETFs for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, the Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage the Portfolio's cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

DFA Real Estate Securities Portfolio

The investment objective of the DFA Real Estate Securities Portfolio is to achieve long-term capital appreciation. The DFA Real Estate Securities Portfolio will concentrate investments in readily marketable equity securities of

companies whose principal activities include ownership, management, development, construction, or sale of residential, commercial or industrial real estate.

The DFA Real Estate Securities Portfolio will purchase shares of real estate investment trusts (“REITs”) and REIT-like entities. REITs and REIT-like entities pool investors’ funds for investment primarily in income producing real estate or real estate related loans or interests. A REIT is not taxed on income distributed to shareholders if it complies with several requirements relating to its organization, ownership, assets, and income and a requirement that it distribute to its shareholders at least 90% of its taxable income (other than net capital gains) for each taxable year.

On at least a semi-annual basis, the Advisor identifies a schedule of eligible investments consisting of equity securities of companies in the real estate industry described above. It is the intention of the Portfolio to invest in the securities of eligible companies using a market capitalization weighted approach. See **“Market Capitalization Weighted Approach.”**

If securities must be sold in order to obtain funds to make redemption payments, such securities may be repurchased by the DFA Real Estate Securities Portfolio, as additional cash becomes available to it. However, the Portfolio has retained the right to borrow to make redemption payments and is also authorized to redeem its shares in kind. See **“REDEMPTION OF SHARES.”** Further, because the securities of certain companies whose shares are eligible for purchase are thinly traded, the Portfolio might not be able to purchase the number of shares that strict adherence to market capitalization weighting might require.

Investments will not be based upon an issuer’s dividend payment policy or record. However, many of the companies whose securities will be included in the DFA Real Estate Securities Portfolio do pay dividends. It is anticipated, therefore, that the Portfolio will receive dividend income. Periodically, the Advisor may expand the investments eligible for the Portfolio to include equity securities of companies in sectors of the real estate industry in addition to those described above as eligible for investment as of the date of this Prospectus.

The DFA Real Estate Securities Portfolio may invest in exchange-traded funds (ETFs) for the purpose of gaining exposure to the U.S. stock market while maintaining liquidity. In addition to money market instruments and other short-term investments, the Portfolio may invest in affiliated and unaffiliated registered and unregistered money market funds to manage the Portfolio’s cash pending investment in other securities or to maintain liquidity for the payment of redemptions or other purposes. Investments in ETFs and money market funds may involve a duplication of certain fees and expenses.

MARKET CAPITALIZATION WEIGHTED APPROACH

The portfolio structures of the U.S. Small Cap Value Portfolio, U.S. Targeted Value Portfolio, each U.S. Small Company Portfolio and the DFA Real Estate Securities Portfolio involve market capitalization weighting in determining individual security weights. Market capitalization weighting means each security is generally purchased based on the issuer’s relative market capitalization. Market capitalization weighting may be modified by the Advisor for a variety of reasons. The Advisor may adjust the representation in the U.S. Small Cap Value Portfolio, U.S. Targeted Value Portfolio and each U.S. Small Company Portfolio of an eligible company, or exclude a company, after considering such factors as free float, momentum, trading strategies, liquidity, size, relative price, profitability, investment characteristics, and other factors that the Advisor determines to be appropriate. The Advisor may adjust the representation in the DFA Real Estate Securities Portfolio of an eligible company, or exclude a company, after considering such factors as free float, momentum, trading strategies, liquidity, size, relative price, profitability, and other factors that the Advisor determines to be appropriate. An equity issuer is considered to have a low relative price (i.e., a value stock) primarily because it has a low price in relation to its book value. In assessing relative price, the Advisor may consider additional factors such as price to cash flow or price to earnings ratios. An equity issuer is considered to have high profitability because it has high earnings or profits from operations in relation to its book value or assets. In assessing a company’s investment characteristics, the Advisor considers ratios such as recent changes in assets divided by total assets. The criteria the Advisor uses for assessing relative price, profitability, and investment characteristics are subject to change from time to time. The Advisor may deviate from market capitalization weighting to limit or fix the exposure of a Portfolio to a particular issuer to a maximum proportion of the assets of the Portfolio. The Advisor may exclude

the stock of a company that meets applicable market capitalization criterion if the Advisor determines, in its judgment, that the purchase of such stock is inappropriate in light of other conditions. With respect to the U.S. Small Cap Value Portfolio, U.S. Targeted Value Portfolio, and each U.S. Small Company Portfolio, the Advisor may decrease the amount that a Portfolio invests in eligible small capitalization companies (micro capitalization companies for the U.S. Micro Cap Portfolio) that have lower profitability and/or higher relative prices. These adjustments will result in a deviation from traditional market capitalization weighting.

Adjustment for free float modifies market capitalization weighting to exclude the share capital of a company that is not freely available for trading in the public equity markets. For example, the following types of shares may be excluded: (i) those held by strategic investors (such as governments, controlling shareholders and management), (ii) treasury shares, or (iii) shares subject to foreign ownership restrictions.

Furthermore, the Advisor may reduce the relative amount of any security held in order to retain sufficient portfolio liquidity. A portion, but generally not in excess of 20% of assets, may be invested in interest bearing obligations, such as money market instruments, thereby causing further deviation from market capitalization weighting. A further deviation may occur due to holdings in securities received in connection with corporate actions.

Block purchases of eligible securities may be made at opportune prices, even though such purchases exceed the number of shares that, at the time of purchase, adherence to a market capitalization weighted approach would otherwise require. In addition, securities eligible for purchase or otherwise represented in a Portfolio may be acquired in exchange for the issuance of shares. See **"PURCHASE OF SHARES—In-Kind Purchases."** While such transactions might cause a deviation from market capitalization weighting, they would ordinarily be made in anticipation of further growth of assets.

Generally, changes in the composition and relative ranking (in terms of market capitalization) of the stocks that are eligible for purchase take place with every trade when the securities markets are open for trading due, primarily, to price changes of such securities. On at least a semi-annual basis, the Advisor will identify companies whose stock is eligible for investment by a Portfolio. Additional investments generally will not be made in securities that have changed in value sufficiently to be excluded from the Advisor's then current market capitalization requirement for eligible portfolio securities. This may result in further deviation from market capitalization weighting. Such deviation could be substantial if a significant amount of holdings of a Portfolio change in value sufficiently to be excluded from the requirement for eligible securities, but not by a sufficient amount to warrant their sale.

PORTFOLIO CONSTRUCTION—U.S. SMALL COMPANY PORTFOLIOS

Each of the U.S. Small Company Portfolios intends to invest in the securities of eligible companies using a market capitalization weighted approach. See **"Market Capitalization Weighted Approach."**

If securities must be sold in order to obtain funds to make redemption payments, such securities may be repurchased, as additional cash becomes available. In most instances, however, management would anticipate selling securities which had appreciated sufficiently to be eligible for sale and, therefore, would not need to repurchase such securities.

Generally, current income is not sought as an investment objective and investments will not be based upon an issuer's dividend payment policy or record. However, many of the companies whose securities will be selected for investment do pay dividends. It is anticipated, therefore, that dividend income will be received.

PORTFOLIO TRANSACTIONS—ALL PORTFOLIOS

In general, securities will not be purchased or sold based on the prospects for the economy, the securities markets or the individual issuers whose shares are eligible for purchase. Securities which have depreciated in value since their acquisition will not be sold solely because prospects for the issuer are not considered attractive or due to an expected or realized decline in securities prices in general. Securities generally will not be sold solely to realize short-term profits, but when circumstances warrant, they may be sold without regard to the length of

time held. Securities, including those eligible for purchase, may be disposed of, however, at any time when, in the Advisor's judgment, circumstances warrant their sale, including but not limited to tender offers, mergers and similar transactions, or bids made for block purchases at opportune prices. Generally, securities will be purchased with the expectation that they will be held for longer than one year and will be held until such time as they are no longer considered an appropriate holding in light of the investment policy of each Portfolio and Master Fund.

In attempting to respond to adverse market, economic, political, or other conditions, a Portfolio or Master Fund may, from time to time, invest its assets in a temporary defensive manner that is inconsistent with the Portfolio's or Master Fund's principal investment strategies. In these circumstances, the Portfolio or Master Fund (and in turn, its corresponding Feeder Portfolio) may be unable to achieve its investment objective.

ADDITIONAL INFORMATION REGARDING INVESTMENT RISKS

Because the value of your investment in a Portfolio will fluctuate, there is the risk that you will lose money. An investment in a Portfolio is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a description of principal risks of investing in the Portfolios.

	U.S. Large Company Portfolio	Enhanced U.S. Large Company Portfolio	U.S. Large Cap Equity Portfolio	U.S. Large Cap Value Portfolio	U.S. Small Cap Value Portfolio	U.S. Targeted Value Portfolio	U.S. Core Equity 1 Portfolio

Call Risk: Call Risk is the risk that an issuer may exercise its right to redeem a fixed income security earlier than its maturity date. Issuers may call outstanding securities prior to their maturity for a number of reasons (e.g., declining interest rates changes in credit spreads and improvements in the issuer's credit quality). If an issuer calls a security that the Portfolio has invested in, the Portfolio may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks or securities with other, less favorable features.

Credit Risk: Credit risk is the risk that the issuer of a security may be unable to make interest payments and/or repay principal when due. A downgrade to an issuer's credit rating or a perceived change in an issuer's financial strength may affect a security's value, and thus, impact the Portfolio's performance. Government agency obligations have different levels of credit support and, therefore, different degrees of credit risk. Securities issued by agencies and instrumentalities of the U.S. Government that are supported by the full faith and credit of the United States, such as the Federal Housing Administration and Ginnie Mae, present little credit risk. Other securities issued by agencies and instrumentalities sponsored by the U.S. Government, that are supported only by the issuer's right to borrow from the U.S. Treasury, subject to certain limitations, and securities issued by agencies and instrumentalities sponsored by the U.S. Government that are sponsored by the credit of the issuing agencies, such as Freddie Mac and Fannie Mae, are subject to a greater degree of credit risk. U.S. government agency securities issued or guaranteed by the credit of the agency may still involve a risk of non-payment of principal and/or interest.

Cyber Security Risk: The Portfolio's and its service providers' use of internet, technology and information systems may expose the Portfolio to potential risks linked to cyber security breaches of those technological or information systems. Cyber security breaches, amongst other things, could allow an unauthorized party to gain access to proprietary information, customer data, or fund assets, or cause the Portfolio and/or its service providers to suffer data corruption or lose operational functionality.

Derivatives Risk: Derivatives are instruments, such as futures, and options thereon, foreign currency forward contracts and swaps, whose value is derived from that of other assets, rates or indices. Derivatives can be used for hedging (attempting to reduce risk by offsetting one investment position with another) or non-hedging purposes. Hedging with derivatives may increase expenses, and there is no guarantee that a hedging strategy will work. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains or cause losses if the market moves in a manner different from that anticipated by the Portfolio or if the cost of the derivative outweighs the benefit of the hedge. In regard to currency hedging, it is generally not possible to precisely match the foreign currency exposure of such foreign currency forward contracts to the value of the securities involved due to fluctuations in the market values of such securities and cash flows into and out of the Portfolio between the date a foreign currency forward contract is entered into and the date it expires. The use of derivatives for non-hedging purposes may be considered to carry more risk than other types of investments. When the Portfolio uses derivatives, the Portfolio will be directly exposed to the risks of those derivatives. Derivatives expose the Portfolio to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations), including credit risk of the derivative counterparty, and settlement risk (the risk faced when one party to a

transaction has performed its obligations under a contract but has not yet received value from its counterparty). The possible lack of a liquid secondary market for derivatives and the resulting inability of the Portfolio to sell or otherwise close a derivatives position could expose the Portfolio to losses and could make derivatives more difficult for the Portfolio to value accurately. Some derivatives are more sensitive to interest rate changes and market price fluctuations than other securities. The Portfolio could also suffer losses related to its derivatives positions as a result of unanticipated market movements, which losses are potentially unlimited. The Advisor may not be able to predict correctly the direction of securities prices, interest rates and other economic factors, which could cause the Portfolio's derivatives positions to lose value. Valuation of derivatives may also be more difficult in times of market turmoil since many investors and market makers may be reluctant to purchase derivatives or quote prices for them. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Portfolio could lose more than the principal amount invested. Additional risks are associated with the use of swaps including counterparty and credit risk (the risk that the other party to a swap agreement will not fulfill its contractual obligations, whether because of bankruptcy or other default) and liquidity risk (the possible lack of a secondary market for the swap agreement). Credit risk increases when the Portfolio is the seller of swaps and counterparty risk increases when the Portfolio is a buyer of swaps. In addition, where the Portfolio is the seller of swaps, it may be required to liquidate portfolio securities at inopportune times in order to meet payment obligations or segregation requirements. Swaps may be illiquid or difficult to value.

Equity Market Risk: Even a long-term investment approach cannot guarantee a profit. Economic, market, political, and issuer-specific conditions and events will cause the value of equity securities, and the Portfolio that owns them, to rise or fall. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. In addition, economies and financial markets throughout the world have become increasingly interconnected, which increases the likelihood that events or conditions in one region or country will adversely affect markets or issuers in other regions or countries. Portfolio securities may be negatively impacted by inflation (or expectations for inflation), interest rates, global demand for particular products/services or resources, natural disasters, pandemics, epidemics, terrorism, war, military confrontations, regulatory events and governmental or quasi-governmental actions, among others.

The ongoing outbreak of the novel coronavirus, COVID-19, has resulted, at times, in market closures, market volatility, liquidity constraints and increased trading costs. Efforts to contain the spread of COVID-19 have resulted in global travel restrictions and disruptions of healthcare systems, business operations and supply chains, layoffs, reduced consumer demand, defaults and credit rating downgrades, and other significant economic impacts. The effects of COVID-19 have impacted global economic activity and may heighten pre-existing political, social and economic risks, domestically or globally. The full impact of the COVID-19 pandemic is unpredictable and may adversely affect the Portfolio's performance.

Foreign Government Debt Risk: The risk that: (a) the governmental entity that controls the repayment of government debt may not be willing or able to repay the principal and/or to pay the interest when it becomes due, due to factors such as political considerations, the relative size of the governmental entity's debt position in relation to the economy, cash flow problems, insufficient foreign currency reserves, the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies, and/or other national economic factors; (b) governments may default on their debt securities, which may require holders of such securities to participate in debt rescheduling; and (c) there is no legal or bankruptcy process by which defaulted government debt may be collected in whole or in part.

Foreign Securities and Currencies Risk: Foreign securities prices may decline or fluctuate because of: (a) economic or political actions of foreign governments, and/or (b) less regulated or liquid securities markets. Investors holding these securities may also be exposed to foreign currency risk (the possibility that foreign currency will fluctuate in value against the U.S. dollar or that a foreign government will convert, or be forced to convert, its currency to another currency, changing its value against the U.S. dollar). The Portfolio hedges foreign currency risk.

Income Risk: Income risk is the risk that falling interest rates will cause the Portfolio's income to decline because, among other reasons, the proceeds from maturing short-term securities in its portfolio may be reinvested in lower-yielding securities.

Interest Rate Risk: Fixed income securities are subject to interest rate risk because the prices of fixed income securities tend to move in the opposite direction of interest rates. When interest rates rise, fixed income security prices fall. When interest rates fall, fixed income security prices rise. In general, fixed income securities with longer maturities are more sensitive to changes in interest rates. The Portfolio may be subject to a greater risk of rising interest rates due to the current period of historically low interest rates.

Liquidity Risk: Liquidity risk exists when particular portfolio investments are difficult to purchase or sell. To the extent that the Portfolio holds illiquid investments, the Portfolio's performance may be reduced due to an inability to sell the investments at opportune prices or times. Liquid portfolio investments may become illiquid or less liquid after purchase by the Portfolio due to low trading volume, adverse investor perceptions and/or other market developments. Liquidity risk includes the risk that the Portfolio will experience significant net redemptions at a time when it cannot find willing buyers for its portfolio securities or can only sell its portfolio securities at a material loss or at increased costs. Liquidity risk can be more pronounced in periods of market turmoil or in situations where ownership of shares of the Portfolio are concentrated in one or a few investors.

Operational Risk: Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Advisor's control, including instances at third parties. The Portfolio and the Advisor seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Profitability Investment Risk: High relative profitability stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies.

Risks of Concentrating in the Real Estate Industry: The Portfolio is concentrated in the real estate industry. The exclusive focus by the Portfolio on the real estate industry will cause the Portfolio to be exposed to the general risks of direct real estate ownership. The value of securities in the real estate industry can be affected by changes in real estate values and rental income, property taxes, and tax and regulatory requirements. Also, the value of securities in the real estate industry may decline with changes in interest rates. Investing in REITs and REIT-like entities involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs and REIT-like entities are dependent upon management skill, may not be diversified, and are subject to heavy cash flow dependency and self-liquidation. REITs and REIT-like entities also are subject to the possibility of failing to qualify for tax free pass-through of income. Also, because REITs and REIT-like entities typically are invested in a limited number of projects or in a particular market segment, these entities are more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments. The performance of Portfolio may be materially different from the broad equity market.

Small Company Risk: Securities of small companies are often less liquid than those of large companies and this could make it difficult to sell a small company security at a desired time or price. As a result, small company stocks may fluctuate relatively more in price. In general, smaller capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Small and Mid-Cap Company Risk: Securities of small and mid-cap companies are often less liquid than those of large companies and this could make it difficult to sell a small or mid-cap company security at a desired time or price. As a result, small and mid-cap company stocks may fluctuate relatively more in price. In general, small and mid-capitalization companies are also more vulnerable than larger companies to adverse business or economic developments and they may have more limited resources.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, the Portfolio or Series may lose money and there may be a delay in recovering the loaned securities. The Portfolio or Series could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. Securities lending also may have certain adverse tax consequences.

Value Investment Risk: Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Portfolio to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Other Information

COMMODITY POOL OPERATOR EXEMPTION

Each Portfolio and the Master Fund is operated by a person that has claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act (“CEA”) with respect to the Portfolios and the Master Fund described in this Prospectus, and, therefore, such person is not subject to registration or regulation as a pool operator under the CEA with respect to such Portfolios and the Master Fund.

Securities Loans

All of the Portfolios and the Master Fund are authorized to lend securities to qualified brokers, dealers, banks and other financial institutions for the purpose of earning additional income, although inasmuch as the Feeder Portfolio will only hold shares of its corresponding Master Fund, the Feeder Portfolio does not intend to lend those shares. While a Portfolio or the Master Fund may earn additional income from lending securities, such activity is incidental to the investment objective of a Portfolio or the Master Fund. For information concerning the revenue from securities lending, see “**SECURITIES LENDING REVENUE.**” The value of securities loaned may not exceed 33⅓% of the value of a Portfolio’s or Master Fund’s total assets, which includes the value of collateral received. To the extent a Portfolio or Master Fund loans a portion of its securities, a Portfolio or Master Fund will receive collateral consisting generally of cash or U.S. government securities. Collateral received will be maintained by marking to market daily and (i) in an amount equal to at least 100% of the current market value of the loaned securities with respect to securities of the U.S. Government or its agencies, (ii) in an amount generally equal to 102% of the current market value of the loaned securities with respect to U.S. securities, and (iii) in an amount generally equal to 105% of the current market value of the loaned securities with respect to foreign securities. Subject to their stated investment policies, the Portfolios and the Master Fund will generally invest the cash collateral received for the loaned securities in The DFA Short Term Investment Fund (the “Money Market Series”), an affiliated registered money market fund advised by the Advisor for which the Advisor receives a management fee of 0.05% of the average daily net assets of the Money Market Series. The Portfolios and the Master Fund may also invest such collateral in securities of the U.S. Government or its agencies, repurchase agreements collateralized by securities of the U.S. Government or its agencies, and unaffiliated registered and unregistered money market funds. For purposes of this paragraph, agencies include both agency debentures and agency mortgage backed securities.

In addition, the Portfolios and the Master Fund will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest or other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible to be taxed at qualified dividend income rates. See the statement of additional information (“SAI”) for a further discussion of the tax consequences related to securities lending. A Portfolio or Master Fund will be entitled to recall a loaned security in time to vote proxies or otherwise obtain rights to vote proxies of loaned securities if the Portfolio or Master Fund knows a material event will occur. In the event of the bankruptcy of the borrower, DFA Investment Dimensions Group, Inc., Dimensional Investment Group Inc. (each a “Fund” and collectively the “Funds”) or the Trust could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value. See “**Principal Risks—Securities Lending Risks**” for a discussion of the risks related to securities lending.

Securities Lending Revenue

During the fiscal year ended October 31, 2021, the following Portfolios received the following net revenues from a securities lending program (see “**SECURITIES LOANS**”), which constituted a percentage of the average daily net assets of the Portfolio:

Portfolio	Net Revenue**	Percentage of Net Assets
U.S. Large Company Portfolio	\$221,104	0.00%
Enhanced U.S. Large Company Portfolio	\$3,467	0.00%
U.S. Large Cap Equity Portfolio	\$81,036	0.00%
U.S. Large Cap Value Portfolio*	\$597,846	0.00%
U.S. Small Cap Value Portfolio	\$3,515,852	0.02%
U.S. Targeted Value Portfolio	\$2,232,246	0.02%
U.S. Core Equity 1 Portfolio	\$1,821,550	0.01%
U.S. Core Equity 2 Portfolio	\$2,450,069	0.01%
U.S. Vector Equity Portfolio	\$604,438	0.01%
U.S. Small Cap Portfolio	\$3,279,488	0.02%
U.S. Micro Cap Portfolio	\$2,120,448	0.03%
U.S. High Relative Profitability Portfolio	\$177,893	0.00%
DFA Real Estate Securities Portfolio	\$952,331	0.01%

* A Portfolio with a corresponding Master Fund that is taxed as a partnership. “Net Revenue” reflects the proportional share of the securities lending revenue generated by the Master Fund that was received by the Portfolio.

**The amounts included in the table above may differ from the amounts disclosed in the Portfolios’ annual reports due to timing differences, reconciliations, and certain other adjustments.

Management of the Funds

The Advisor serves as investment advisor to the Portfolios and the Master Fund. Pursuant to an Investment Management Agreement with each Portfolio and the Master Fund, the Advisor is responsible for the management of their respective assets. With respect to an Investment Management Agreement with the Feeder Portfolio, the Advisor manages the portion of the Feeder Portfolio’s assets that are retained by the Feeder Portfolio for direct investment and, at its discretion, may make a determination to withdraw the Feeder Portfolio’s investment from its corresponding Master Fund to invest in another Master Fund or manage all the Feeder Fund’s assets directly if the Advisor believes it is in the best interests of the Feeder Portfolio and its shareholders to do so. As of the date of this Prospectus, the Feeder Portfolio invests substantially all of its assets in its corresponding Master Fund. The Portfolios and the Master Fund are managed using a team approach. The investment team includes the Investment Committee of the Advisor, portfolio managers and trading personnel.

The Investment Committee is composed primarily of certain officers and directors of the Advisor who are appointed annually. As of the date of this Prospectus, the Investment Committee has fourteen members. Investment strategies for all Portfolios and the Master Fund are set by the Investment Committee, which meets on a regular basis and also as needed to consider investment issues. The Investment Committee also sets and reviews all investment related policies and procedures and approves any changes in regards to approved countries, security types and brokers.

In accordance with the team approach used to manage the portfolios, the portfolio managers and portfolio traders implement the policies and procedures established by the Investment Committee. The portfolio

managers and portfolio traders also make daily investment decisions regarding the portfolios based on the parameters established by the Investment Committee. The individuals named in a Portfolio's "**INVESTMENT ADVISOR/PORTFOLIO MANAGEMENT**" section coordinate the efforts of all other portfolio managers or trading personnel with respect to the day to day management of such Portfolio.

Mr. Fogdall is Global Head of Portfolio Management, Chairman of the Investment Committee, Vice President, and a Senior Portfolio Manager of the Advisor. Mr. Fogdall has an MBA from the University of California, Los Angeles and a BS from Purdue University. Mr. Fogdall joined the Advisor as a portfolio manager in 2004 and has been responsible for the Portfolios (except the Enhanced U.S. Large Company Portfolio) since 2012 or since inception with respect to the U.S. Large Cap Equity Portfolio (2013) and U.S. High Relative Profitability Portfolio (2017).

Mr. Hohn is Vice President and a Senior Portfolio Manager of the Advisor. Mr. Hohn holds an MBA from the University of California, Los Angeles, an MS from the University of Southern California and a BS from Iowa State University. Mr. Hohn joined the Advisor in 2012, has been a portfolio manager since 2015, and has been responsible for the U.S. Large Company Portfolio since 2017.

Mr. Schneider is Deputy Head of Portfolio Management, North America, a member of the Investment Committee, Vice President, and a Senior Portfolio Manager of the Advisor. Mr. Schneider holds an MBA from the University of Chicago Booth School of Business, an MS from the University of Minnesota, and a BS from Iowa State University. Mr. Schneider joined the Advisor in 2011, has been a portfolio manager since 2013, and has been responsible for the U.S. Small Cap Value Portfolio, U.S. Targeted Value Portfolio, U.S. Small Cap Portfolio, and U.S. Micro Cap Portfolio since 2015, and the U.S. Large Company Portfolio since 2019.

Mr. Plecha is Global Head of Fixed Income Portfolio Management, a member of the Investment Committee, Vice President, and a Senior Portfolio Manager of the Advisor. Mr. Plecha received his BS from the University of Michigan at Ann Arbor in 1983 and his MBA from the University of California at Los Angeles in 1987. Mr. Plecha has been a portfolio manager since 1989 and responsible for the Enhanced U.S. Large Company Portfolio since 1996.

Mr. Kolerich, Head of Fixed Income, Americas, is a member of Investment Committee, Vice President, and a Senior Portfolio Manager of the Advisor. Mr. Kolerich has an MBA from the University of Chicago Booth School of Business and a BS from Northern Illinois University. Mr. Kolerich joined the Advisor as a portfolio manager in 2001 and has been responsible for the Enhanced U.S. Large Company Portfolio since 2012.

Mr. Fridman is a Vice President and Senior Portfolio Manager of the Advisor. Mr. Fridman holds an MBA from the University of Cambridge, a doctorate from Saint Petersburg State Polytechnical University, two MS degrees from the University of Southern California, and a BS from the University of California-Los Angeles. Mr. Fridman joined the Advisor in 2013, has been a portfolio manager since 2013, and has been responsible for the Enhanced U.S. Large Company Portfolio since 2020.

Mr. Leblond is a Vice President and Senior Portfolio Manager of the Advisor. Mr. Leblond holds an MBA from the University of Chicago, and an MS and BS from Columbia University. Mr. Leblond joined the Advisor in 2015, has been a portfolio manager since 2017, and has been responsible for the U.S. Small Cap Value Portfolio, the U.S. Targeted Value Portfolio, the U.S. Small Cap Portfolio and the U.S. Micro Cap Portfolio since 2020.

Mr. Hertzler is Vice President and a Senior Portfolio Manager of the Advisor. Mr. Hertzler holds an MBA from the University of California, Los Angeles and a BA from Dartmouth College. Mr. Hertzler joined the Advisor in 2013, has been a portfolio manager since 2016, and has been responsible for the U.S. Large Cap Equity Portfolio, U.S. Large Cap Value Portfolio, U.S. Core Equity 1 Portfolio, U.S. Core Equity 2 Portfolio, U.S. Vector Equity Portfolio, U.S. High Relative Profitability Portfolio and DFA Real Estate Securities Portfolio since 2022.

Ms. Phillips is Deputy Head of Portfolio Management, North America, a member of the Investment Committee, Vice President, and a Senior Portfolio Manager of the Advisor. Ms. Phillips holds an MBA from the University of Chicago Booth School of Business and a BA from the University of Puget Sound. Ms. Phillips joined the Advisor in 2012, has been a portfolio manager since 2014, and has been responsible for the U.S. Large Cap Equity Portfolio,

U.S. Large Cap Value Portfolio, U.S. Core Equity 1 Portfolio, U.S. Core Equity 2 Portfolio, U.S. Vector Equity Portfolio, U.S. High Relative Profitability Portfolio and DFA Real Estate Securities Portfolio since 2022.

The Portfolios' SAI provides information about each portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of Fund shares.

The Advisor provides the Portfolios and the Master Fund with a trading department and selects brokers and dealers to effect securities transactions. Securities transactions are placed with a view to obtaining best price and execution. The Advisor may pay compensation, out of the Advisor's profits and not as an additional charge to a Portfolio, to financial intermediaries to support the sale of Portfolio shares. The Advisor's address is 6300 Bee Cave Road, Building One, Austin, TX 78746. A discussion regarding the basis for the Boards of Trustees/Directors approving the Investment Management Agreements with respect to the Portfolios and Master Fund, is available in the semi-annual reports for the Portfolios and Master Fund for the fiscal period ending April 30, 2021.

The Funds and the Trust bear all of their own fees, expenses, charges, assessments, taxes, and other costs incurred in their operations, whether incurred directly by the Funds/Trust or incurred by the Advisor on their behalf. The expenses payable by the Funds/Trust shall include, but are not limited to: services of their independent registered public accounting firm, legal counsel to the Funds/Trust and their disinterested trustees/directors, fees and expenses of disinterested trustees/directors, employees and consultants, accounting and pricing costs (including the daily calculations of net asset value), brokerage fees, commissions and transfer taxes in connection with the acquisition and disposition of portfolio securities, taxes and other governmental fees levied against the Funds/Trust, insurance premiums, investment fees and expenses of the Funds/Trust, including the interest expense of borrowing money, the costs incidental to meetings of their shareholders and trustees/directors, the cost of filing their registration statements under the federal securities laws and the cost of any other filings required under federal and state securities laws, the costs of preparing, printing and mailing proxies, shareholder reports, prospectuses, statements of additional information and other fund documents, transfer and dividend disbursing agency, administrative services and custodian fees, including the expenses of issuing, repurchasing or redeeming their shares, fees and expenses of securities lending agents and the oversight of the securities lending activities of the Funds/Trust, fees and expenses associated with trade administration oversight services with respect to reconciliations and the oversight of settlement and collateral management, litigation, regulatory examinations/proceedings and other extraordinary or nonrecurring expenses, and other expenses properly payable by the Funds/Trust, except as provided in the Fee Waiver and Expense Assumption Agreements for certain classes of the Portfolios. Expenses allocable to a particular Portfolio or Master Fund or class of a Portfolio are so allocated. The expenses of a Fund which are not allocable to a particular Portfolio or class of a Portfolio are to be borne by each Portfolio or class of a Portfolio of the Fund on the basis of its relative net assets. Similarly, the expenses of the Trust which are not allocable to a particular Series are to be borne by the Master Fund on the basis of its relative net assets.

The Advisor has been engaged in the business of providing investment management services since May 1981. The Advisor is currently organized as a Delaware limited partnership and is controlled and operated by its general partner, Dimensional Holdings Inc., a Delaware corporation. The Advisor controls Dimensional Fund Advisors Ltd. ("DFAL") and DFA Australia Limited ("DFA Australia"). As of January 31, 2022 assets under management for all Dimensional affiliated advisors totaled approximately \$659 billion.

MANAGEMENT FEES

The "Annual Fund Operating Expenses" table describes the fees incurred by the U.S. Large Company Portfolio, Enhanced U.S. Large Company Portfolio, and DFA Real Estate Securities Portfolio for the services provided by the Advisor for the fiscal year ended October 31, 2021. The "Annual Fund Operating Expenses" table for the U.S. High Relative Profitability Portfolio describes the management fee to be paid by the Portfolio as a result of a decrease in the management fee payable by the Portfolio effective February 28, 2022. The rate of the management fee payable to the Advisor by the U.S. High Relative Profitability Portfolio was reduced from 0.20% to 0.19% of the Portfolio's average daily net assets on an annualized basis effective February 28, 2022. The "Management Fee" listed in the "Annual Fund Operating Expenses" table for the Non-Feeder Portfolios (excluding the Portfolios listed below) provides the investment management fee that was payable by the respective Portfolio to the Advisor. The "Management Fee" listed in the "Annual Fund Operating Expenses"

table for the Feeder Portfolio includes the investment management fees payable to the Advisor by the Portfolio and the Portfolio's Master Fund.

The following table describes the effective management fee paid to the Advisor by each Portfolio listed below, based on the Portfolio's average daily net assets on an annualized basis, during the fiscal year ended October 31, 2021, and the management fee to be paid by each Portfolio effective as of February 28, 2022 as a result of a decrease in the management fee:

Portfolio	Effective Management Fee 10/31/21 Fiscal Year	Management Fee Effective February 28, 2022
U.S. Large Cap Equity Portfolio	0.11%*	0.10%**
U.S. Large Cap Value Portfolio	0.20%*	0.19%**
U.S. Small Cap Value Portfolio	0.40%*	0.28%
U.S. Targeted Value Portfolio	0.31%*	0.27%
U.S. Core Equity 1 Portfolio	0.13%*	0.12%**
U.S. Core Equity 2 Portfolio	0.16%*	0.16%**
U.S. Vector Equity Portfolio	0.26%*	0.25%**
U.S. Small Cap Portfolio	0.31%*	0.25%
U.S. Micro Cap Portfolio	0.43%*	0.38%

* Management fee reflects a management fee reduction that was effective as of February 28, 2021.

** Management fee reduction was effective as of February 28, 2021.

SHAREHOLDER SERVICES

On behalf of a Portfolio, the Funds may enter into shareholder servicing agreements with financial intermediaries to provide shareholder servicing, recordkeeping, account maintenance and other services to Institutional Class shareholders of the Portfolio. For the array of services provided to Institutional Class shareholders of a Portfolio, the Funds may pay such financial intermediaries a fee for such services. These expenses will be included in "Other Expenses" in the "Annual Fund Operating Expenses" table.

FEE WAIVER AND EXPENSE ASSUMPTION AGREEMENTS

Pursuant to an Amended and Restated Fee Waiver and/or Expense Assumption Agreement (each, a "Fee Waiver Agreement"), the Advisor has contractually agreed to waive certain fees, and in certain instances, assume certain expenses of the Portfolios, as described in the notes below. The Fee Waiver Agreement for the non-Feeder Portfolios below will remain in effect through February 28, 2023, and may only be terminated by the Fund's Board of Directors prior to that date. The Fee Waiver Agreement for such Portfolios shall continue in effect from year to year thereafter unless terminated by a Fund or the Advisor. The Fee Waiver Agreement with respect to the total management fees paid by the Feeder Portfolio, as described in the notes below, will remain in effect permanently, unless terminated by the Fund. With respect to each Fee Waiver Agreement, prior year waived fees and/or assumed expenses can be recaptured only if the expense ratio following such recapture would be less than the expense cap that was in place when such prior year fees were waived and/or expenses assumed, and less than the current expense cap in place for the Portfolio.

U.S. Large Company Portfolio

The Advisor has contractually agreed to waive all or a portion of its management fee to the extent necessary to reduce the ordinary operating expenses (excluding expenses incurred through investment in other investment companies) ("Portfolio Expenses") of the U.S. Large Company Portfolio so that the Portfolio Expenses, on an annualized basis, do not exceed the rate listed below as a percentage of the Portfolio's average net assets (the "Annualized Expense Ratio"). At any time that the annualized Portfolio Expenses of the Portfolio are less than the Annualized Expense Ratio identified below, the Advisor retains the right to recover any fees previously waived

and/or expenses previously assumed to the extent that the amount of such recovery will not cause the annualized Portfolio Expenses of the Portfolio to exceed the applicable Annualized Expense Ratio identified below. The Portfolio is not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement.

Portfolio	Annualized Expense Ratio
U.S. Large Company Portfolio	0.08%

Enhanced U.S. Large Company Portfolio

The Advisor has contractually agreed to waive all or a portion of its management fee and to assume the ordinary operating expenses of a class of the Enhanced U.S. Large Company Portfolio (excluding the expenses that the Portfolio incurs indirectly through its investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of the Portfolio to the rate listed below as a percentage of the average net assets of a class of the Portfolio on an annualized basis (the "Expense Limitation Amount"). At any time that the annualized Portfolio Expenses of the Portfolio are less than the Expense Limitation Amount identified below, the Advisor retains the right to recover any fees previously waived and/or expenses previously assumed to the extent that the amount of such recovery will not cause the annualized Portfolio Expenses of the Portfolio to exceed the applicable Expense Limitation Amount identified below. The Portfolio is not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement.

Portfolio	Expense Limitation Amount
Enhanced U.S. Large Company Portfolio	0.15%

U.S. Large Cap Value Portfolio

The Advisor has contractually agreed to permanently waive all or a portion of the management fee of the Portfolio listed below to the extent necessary to limit the total management fees paid to the Advisor by the Portfolio, including the proportionate share of the management fees the Portfolio pays indirectly through its investment in other funds managed by the Advisor, except for the fees paid indirectly through its investment of securities lending cash collateral in the Money Market Series, to the rate listed below as a percentage of the average net assets of a class of the Portfolio on an annualized basis.

Portfolio	Total Management Fee Limit
U.S. Large Cap Value Portfolio	0.19%

U.S. Targeted Value Portfolio

The Advisor has contractually agreed to waive its management fee and to assume the U.S. Targeted Value Portfolio's Institutional Class Shares' expenses (excluding the expenses the Portfolio incurs indirectly through investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of the Institutional Class Shares to the rate listed below as a percentage of the Portfolio's average net assets of the Institutional Class Shares on an annualized basis (the "Expense Limitation Amount"). At any time that the Portfolio Expenses of the Portfolio's Institutional Class Shares are less than the Expense Limitation Amount identified below, the Advisor retains the right to recover any fees previously waived and/or expenses previously assumed to the extent that such recovery will not cause the annualized Portfolio Expenses of the Institutional Class Shares to exceed the applicable Expense Limitation Amount identified below. The Portfolio is

not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement.

Portfolio	Expense Limitation Amount
U.S. Targeted Value Portfolio	0.50%

U.S. Large Cap Equity Portfolio
U.S. Core Equity 1 Portfolio
U.S. Core Equity 2 Portfolio
U.S. Vector Equity Portfolio
DFA Real Estate Securities Portfolio

The Advisor has contractually agreed to waive all or a portion of its management fee and assume the ordinary operating expenses of a class of each of the following Portfolios (excluding the expenses that the Portfolio incurs indirectly through its investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of each Portfolio, on an annualized basis, to the rates listed below as a percentage of a class of the respective Portfolio's average net assets (the "Expense Limitation Amount"). At any time that the Portfolio Expenses of a class of a Portfolio are less than the applicable Expense Limitation Amount for such class of shares of the Portfolio, the Advisor retains the right to recover any fees previously waived and/or expenses previously assumed to the extent that such recovery will not cause the annualized Portfolio Expenses for such class of shares of the Portfolio to exceed the applicable Expense Limitation Amount identified below. A Portfolio is not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement.

Portfolio	Expense Limitation Amount
U.S. Large Cap Equity Portfolio	0.19%
U.S. Core Equity 1 Portfolio	0.23%
U.S. Core Equity 2 Portfolio	0.26%
U.S. Vector Equity Portfolio	0.36%
DFA Real Estate Securities Portfolio	0.18%

U.S. High Relative Profitability Portfolio

Pursuant to a Fee Waiver and Expense Assumption Agreement (the "Fee Waiver Agreement") for the Portfolio, the Advisor has contractually agreed to waive all or a portion of its management fee and to assume the ordinary operating expenses of a class of the Portfolio (including the expenses that the Portfolio bears as a shareholder of other funds managed by the Advisor, excluding money market funds, but excluding the expenses that the Portfolio incurs indirectly through its investment in unaffiliated investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of the Institutional Class Shares of the Portfolio to the rate listed below as a percentage of the average net assets of the Institutional Class Shares of the Portfolio on an annualized basis (the "Expense Limitation Amount"). At any time that the Portfolio Expenses of a class of the Portfolio are less than the Expense Limitation Amount, the Advisor retains the right to recover any fees previously waived and/or expenses previously assumed to the extent that such recovery will not cause the annualized Portfolio Expenses for such class of shares of the Portfolio to exceed the Expense Limitation Amount. The Portfolio will not reimburse the Advisor for fees waived or expenses previously assumed by the Advisor more than thirty-six months before the date of such reimbursement.

Portfolio	Expense Limitation Amount
U.S. High Relative Profitability Portfolio	0.25%

Dividends, Capital Gains Distributions and Taxes

Dividends and Distributions. Each Portfolio intends to qualify each year as a regulated investment company under the Code. As a regulated investment company, a Portfolio generally pays no federal income tax on the income and gains it distributes to you. Dividends from net investment income of the Portfolios are distributed quarterly (on a calendar basis) and any net realized capital gains (after any reductions for available capital loss carryforwards) are distributed annually, typically in December. The U.S. Core Equity 1 Portfolio, U.S. Core Equity 2 Portfolio, DFA Real Estate Securities Portfolio, U.S. Large Company Portfolio, and U.S. Large Cap Equity Portfolio, and any other Portfolio that becomes an investment option for the Advisor's funds of funds in the future, may also make an additional dividend distribution from net investment income in October of each year. A Portfolio may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Portfolio.

Capital gains distributions may vary considerably from year to year as a result of a Portfolio's normal investment activities and cash flows. During a time of economic volatility, a Portfolio may experience capital losses and unrealized depreciation in value of investments, the effect of which may be to reduce or eliminate capital gains distributions for a period of time. A Portfolio may be required to distribute taxable realized gains from a prior year, even if the Portfolio has a net realized loss for the year of distribution.

You will automatically receive all income dividends and capital gains distributions in additional shares of the Portfolio whose shares you hold at net asset value (as of the business date following the dividend record date), unless, upon written notice to the Advisor and completion of account information, you request to receive income dividends or capital gains distributions, or both, in cash.

Portfolio/Master Fund	Net Investment Income Distribution	
	Annually	Quarterly

U.S. Core Equity 2		X
U.S. Vector Equity		X
U.S. Small Cap		X
U.S. Micro Cap		X
U.S. High Relative Profitability		X
DFA Real Estate Securities		X

Annual Statements. Each year, you will receive a statement that shows the tax status of distributions you received the previous calendar year. Distributions declared in December to shareholders of record in such month, but paid in January, are taxable as if they were paid in December.

Avoid "Buying A Dividend." At the time you purchase your Portfolio shares, a Portfolio's net asset value may reflect undistributed income or undistributed capital gains. A subsequent distribution to you of such amounts, although constituting a return of your investment, would be taxable. Buying shares in a Portfolio just before it declares an income dividend or capital gains distribution is sometimes known as "buying a dividend." In addition, a Portfolio's net asset value may, at any time, reflect net unrealized appreciation, which may result in future taxable distributions to you.

Tax Considerations. This discussion of “*Tax Considerations*” should be read in conjunction with the remaining subsections below containing additional information. Also, unless otherwise indicated, the discussion below with respect to a Portfolio includes in the case of a Feeder Portfolio invested in a Master Fund, its pro rata share of its corresponding Master Fund’s income and assets.

In general, if you are a taxable investor, Portfolio distributions are taxable to you as ordinary income, capital gains, or some combination of both. This is true whether you reinvest your distributions in additional Portfolio shares or receive them in cash.

For federal income tax purposes, Portfolio distributions of short-term capital gains are taxable to you at ordinary income rates. Portfolio distributions of long-term capital gains are taxable to you at long-term capital gain rates no matter how long you have owned your shares. A portfolio with a high portfolio turnover rate (a measure of how frequently assets within a portfolio are bought and sold) is more likely to generate short-term capital gains than a portfolio with a low portfolio turnover. A portion of income dividends reported by a Portfolio as qualified dividend income may be eligible for taxation by individual shareholders at long-term capital gain rates provided certain requirements are met.

Compared to other types of investments, derivatives may be less tax efficient. For example, the use of derivatives by a Portfolio may cause the Portfolio to realize higher amounts of ordinary income or short-term capital gain, distributions from which are taxable to individual shareholders at ordinary income tax rates rather than at the more favorable tax rates for long-term capital gains. Changes in government regulation of derivative instruments could affect the character, timing and amount of a Portfolio’s taxable income or gains, and may limit or prevent the Portfolio from using certain types of derivative instruments as a part of its investment strategy. A Portfolio’s use of derivatives also may be limited by the requirements for taxation of the Portfolio as a regulated investment company.

If a Portfolio qualifies to pass through to you the tax benefits from foreign taxes it pays on its investments, and elects to do so, then any foreign taxes it pays on these investments will be treated as paid by you. You will then be entitled either to deduct your share of these taxes in computing your taxable income, or to claim a foreign tax credit for these taxes against your U.S. federal income tax (subject to limitations for certain shareholders).

The Board of Trustees of a Master Fund reserves the right to change the entity classification of a Master Fund for U.S. federal income tax purposes at any time, as may be permitted or required under the Code. For instance, the Board might cause a Master Fund that is classified as a partnership to elect to be classified as a corporation and taxable as a regulated investment company or disregarded entity (if it has one shareholder) or vice versa. Such a change in entity classification may be prompted by, among other things, changes in law, the investment strategy of a Master Fund, or the nature and number of shareholders of a Master Fund or other factors or events adversely affecting the ability of a Master Fund to comply with the Code. A change in entity classification of a Master Fund may be a taxable event, causing the Master Fund and shareholders of the Master Fund that are subject to tax to recognize a taxable gain or loss. Such a change in entity classification would also cause the shareholders of the Master Fund to be subject to a different taxation regime, which may adversely affect some shareholders depending upon their particular circumstances.

Sale or Redemption of Portfolio Shares. The sale of shares of a Portfolio is a taxable event and may result in a capital gain or loss to you. Capital gain or loss may be realized from an ordinary redemption of shares or an exchange of shares between two Portfolios. Any loss incurred on the sale or exchange of a Portfolio’s shares, held for six months or less, will be treated as a long-term capital loss to the extent of capital gain dividends received with respect to such shares.

A Portfolio is required to report to you and the Internal Revenue Service annually on Form 1099-B not only the gross proceeds of Portfolio shares you sell or redeem but also the cost basis for shares you sell or redeem that were purchased or acquired on or after January 1, 2012. Cost basis will be calculated using the Portfolios’ default method of average cost, unless you instruct a Portfolio to use a different calculation method. Shareholders should carefully review the cost basis information provided by a Portfolio and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns. If your account is held by your investment representative (financial advisor or other broker), please contact that

representative with respect to reporting of cost basis and available elections for your account. Tax-advantaged retirement accounts will not be affected.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Portfolio and net gains from redemptions or other taxable dispositions of Portfolio shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount. This Medicare tax, if applicable, is reported by you on, and paid with, your federal income tax return.

Backup Withholding. By law, a Portfolio may be required to withhold 24% of taxable dividends, capital gains distributions, and redemption proceeds paid to you if you do not provide your proper taxpayer identification number and certain required certifications. You may avoid this withholding requirement by providing and certifying on the account registration form your correct Taxpayer Identification Number and by certifying that you are not subject to backup withholding and are a U.S. person (including a U.S. resident alien). A Portfolio must also withhold if the Internal Revenue Service instructs it to do so.

State and Local Taxes. In addition to federal taxes, you may be subject to state and local taxes on distributions from a Portfolio and on gains arising on redemption or exchange of a Portfolio's shares. Distributions of interest income and capital gains realized from certain types of U.S. Government securities may be exempt from state personal income taxes.

Non-U.S. Investors. Non-U.S. investors may be subject to U.S. withholding tax, at either the 30% statutory rate or a lower rate if you are a resident of a country that has a tax treaty with the U.S., and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. Exemptions from U.S. withholding tax are provided for certain capital gain dividends paid by a Portfolio from net long-term capital gains, if any, interest-related dividends paid by a Portfolio from its qualified net interest income from U.S. sources and short-term capital gain dividends, if such amounts are reported by a Portfolio. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person. Non-U.S. investors also may be subject to U.S. estate tax.

Other Reporting and Withholding Requirements. Under the Foreign Account Tax Compliance Act ("FATCA"), a Portfolio will be required to withhold a 30% tax on income dividends made by a Portfolio to certain foreign entities, referred to as foreign financial institutions or non-financial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. After December 31, 2018, FATCA withholding also would have applied to certain capital gain distributions, return of capital distributions and the proceeds arising from the sale of Portfolio shares; however, based on proposed regulations issued by the Internal Revenue Service, which may be relied upon currently, such withholding is no longer required unless final regulations provide otherwise (which is not expected). A Portfolio may disclose the information that it receives from its shareholders to the Internal Revenue Service, non-U.S. taxing authorities or other parties as necessary to comply with FATCA or similar laws. Withholding also may be required if a foreign entity that is a shareholder of a Portfolio fails to provide the Portfolio with appropriate certifications or other documentation concerning its status under FATCA.

SPECIAL TAX CONSIDERATIONS FOR INVESTORS THAT INVEST IN THE DFA REAL ESTATE SECURITIES PORTFOLIO

PFIC Securities. The Portfolio may invest in securities of foreign entities that could be deemed for tax purposes to be PFICs. In general, any foreign corporation is considered a PFIC if 75% or more of its gross income for its taxable year is passive income, or 50% or more of its average assets (by value) are held for the production of passive income. When investing in PFIC securities, the Portfolio intends to mark-to-market these securities and recognize any unrealized gains as ordinary income at the end of its fiscal year. Deductions for losses are allowable only to the extent of any current or previously recognized gains. These gains (reduced by allowable losses) are treated as ordinary income that the Portfolio is required to distribute, even though it has not sold or received

dividends from these securities. You should also be aware that the designation of a foreign security as a PFIC security will cause its income dividends to fall outside of the definition of qualified foreign corporation dividends. These dividends generally will not qualify for the reduced rate of taxation on qualified dividends when distributed to you by the Portfolio. Due to various complexities in identifying PFICs, the Portfolio can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for the Portfolio to make a mark-to-market election. If the Portfolio is unable to identify an investment as a PFIC and thus does not make a mark-to-market election, the Portfolio may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the Portfolio to its shareholders. Additional charges in the nature of interest may be imposed on the Portfolio in respect of deferred taxes arising from such distributions or gains. Any such taxes or interest charges could in turn reduce the Portfolio's distributions paid to you.

Investment in U.S. REITS. A U.S. REIT is not subject to federal income tax on the income and gains it distributes to shareholders. Dividends paid by a U.S. REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the U.S. REIT's current and accumulated earnings and profits. Capital gain dividends paid by a U.S. REIT to a Portfolio will be treated as long-term capital gains by a Portfolio and, in turn, may be distributed by a Portfolio to its shareholders as a capital gain distribution. Because of certain noncash expenses, such as property depreciation, an equity U.S. REIT's cash flow may exceed its taxable income. The equity U.S. REIT, and in turn a Portfolio, may distribute this excess cash to shareholders in the form of a return of capital distribution. However, if a U.S. REIT is operated in a manner that fails to qualify as a REIT, an investment in the U.S. REIT would become subject to double taxation, meaning the taxable income of the U.S. REIT would be subject to federal income tax at the corporate income tax rate without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the U.S. REIT's current and accumulated earnings and profits.

Receipt of Excess Inclusion Income by a Portfolio. The Portfolio may derive "excess inclusion income" from certain equity interests in mortgage pooling vehicles either directly or through an investment in a U.S. REIT. Please see the SAI for a discussion of the risks and special tax consequences to tax-exempt and other shareholders in the event the Portfolio realizes excess inclusion income in excess of certain threshold amounts.

Investment in U.S. Real Property. The sale of a U.S. real property interest by a U.S. REIT or U.S. real property holding corporation in which a Portfolio invests may trigger special tax consequences to the Portfolio's non-U.S. investors. Please see the SAI for a discussion of the risks and special tax consequences to shareholders from a sale of a U.S. real property interest by a U.S. REIT or U.S. real property holding corporation in which a Portfolio invests.

Qualified REIT dividends. Under 2017 legislation commonly known as the Tax Cuts and Jobs Act "qualified REIT dividends" (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income) are treated as eligible for a 20% deduction by noncorporate taxpayers. A Portfolio may choose to report the special character of "qualified REIT dividends" to its shareholders, provided both the Fund and the shareholder meets certain holding period requirements with respect to their shares.

This discussion of "DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS AND TAXES" is not intended or written to be used as tax advice. Because everyone's tax situation is unique, you should consult your tax professional about federal, state, local or foreign tax consequences before making an investment in a Portfolio. Prospective investors should also consult the SAI.

Purchase of Shares

CASH PURCHASES

Investors who do not already have an agreement in place with a Fund may purchase Institutional Class shares of any Portfolio by first contacting the Portfolio's transfer agent at (888) 576-1167. Investors that invest through a financial intermediary should contact such intermediary with regard to purchase instructions. The Portfolios generally are available for investment only by institutional clients, clients of registered investment advisors, clients

of financial institutions, and a limited number of certain other investors, each as approved from time to time by the Advisor ("Eligible Investors"). Eligible Investors include employees, former employees, shareholders and directors of the Advisor and the Funds and friends and family members of such persons. The Portfolios generally are available for investment only to U.S. citizens, U.S. residents, and U.S. domestic corporations, partnerships, trusts, or other entities. For purposes of this limitation, U.S. citizens and U.S. residents must reside in the U.S. and U.S. domestic corporations, partnerships, trusts, and other entities must have a U.S. address of record. All investments are subject to approval of the Advisor, and all investors must complete and submit the necessary account registration forms in good order. The Funds reserve the right to reject any initial or additional investment and to suspend the offering of shares of any Portfolio.

All purchases must be received in good order. "Good order" with respect to the purchase of shares means that (1) a fully completed and properly signed Account Registration Form and any additional supporting legal documentation required by the Advisor and/or transfer agent have been received in legible form, and (2) the transfer agent has been notified of the purchase, no later than the close of regular trading on the NYSE (normally, 4:00 p.m. ET) ("Market Close") on the day of the purchase. It is the investor or financial intermediary's responsibility to ensure notification is received in good order by the transfer agent prior to the Market Close on the purchase date.

Under certain conditions, Portfolios may accept and process purchase orders after the close of the NYSE on days that the NYSE unexpectedly closes early and may accept orders on a business day that the NYSE is unexpectedly closed. All orders will be processed at the next determined net asset value per share.

Payment

Payment of the total amount due should be made in U.S. dollars. If your payment is not received on settlement date, your purchase may be canceled. If an order to purchase shares must be canceled due to nonpayment, the purchaser will be responsible for any loss incurred by a Fund arising out of such cancellation. To recover any such loss, the Funds reserve the right to redeem shares owned by any purchaser whose order is canceled, and such purchaser may be prohibited or restricted in the manner of placing further orders.

Purchase by wire or check

Wire. Investors having an account with a bank that is a member or a correspondent of a member of the Federal Reserve System may purchase shares by wire after providing notification to the transfer agent by an approved method. The transfer agent can be reached by phone at (888) 576-1167. Notification must include the account number, account name, Portfolio number, trade date and purchase amount. On or before settlement date, the investor paying by wire must request their bank to transmit immediately available funds (federal funds) by wire to the Fund's custodian for the account of DFA Investment Dimensions Group Inc. (specify the Portfolio) or, with regard to purchases of the U.S. Large Company Portfolio, for the account of Dimensional Investment Group Inc. Additional investments also may be made through the wire procedure by first notifying the transfer agent. If your payment is not received on settlement date, your purchase may be canceled.

Check. Investors who wish to purchase shares of any Portfolio by check should first call the Portfolio's transfer agent at (888) 576-1167 for additional instructions. Checks should be made payable to Dimensional Funds. Reference the name of the Portfolio in which you wish to invest.

Shares also may be purchased and sold by individuals through securities firms that may charge a service fee or commission for such transactions. No such fee or commission is charged on shares that are purchased or redeemed directly from the Funds. Investors who are clients of investment advisory organizations may also be subject to investment advisory fees under their own arrangements with such organizations.

IN-KIND PURCHASES

If accepted by the Funds, shares of the Portfolios may be purchased in exchange for securities that are eligible for acquisition by the Portfolios (or corresponding Master Fund) or otherwise represented in their portfolios as described in this Prospectus or as otherwise consistent with the Funds' policies or procedures or in exchange for

local currencies in which the securities of the Enhanced U.S. Large Company Portfolio are denominated. Securities and local currencies accepted by the Funds for exchange and Fund shares to be issued in the exchange will be valued as set forth under “**VALUATION OF SHARES**” at the time of the next determination of net asset value after such acceptance. All dividends, interest, subscription, or other rights pertaining to such securities shall become the property of the Portfolio whose shares are being acquired and must be delivered to the Fund by the investor upon receipt from the issuer. Investors who desire to purchase shares of the Enhanced U.S. Large Company Portfolio with local currencies should first contact the Advisor.

The Funds will not accept securities in exchange for shares of a Portfolio unless: (1) such securities are, at the time of the exchange, eligible to be included, or otherwise represented, in the Portfolio whose shares are to be issued (or in its corresponding Master Fund) and current market values are available for such securities based on a Fund’s valuation procedures; (2) the investor represents and agrees that all securities offered to be exchanged are not subject to any restrictions upon their sale by the Portfolio under the Securities Act of 1933 or under the laws of the country in which the principal market for such securities exists, or otherwise; and (3) at the discretion of the respective Fund, the value of any such security (except U.S. government securities) being exchanged, together with other securities of the same issuer owned by the Portfolio or Master Fund may not exceed 5% of the net assets of the Portfolio or Master Fund immediately after the transaction.

A gain or loss for federal income tax purposes will generally be realized by investors who are subject to federal taxation upon the exchange depending upon the cost of the securities or local currency exchanged. Investors interested in such exchanges should contact the Advisor. Purchases of shares will be made in full and fractional shares calculated to three decimal places. In the interest of economy and convenience, certificates for shares will not be issued.

Policy Regarding Excessive Short-Term Trading

The Portfolios are designed for long-term investors (except as described below) and are not intended for investors that engage in excessive short-term trading activity that may be harmful to the Portfolios, including but not limited to market timing. Excessive short-term trading into and out of the Portfolios can disrupt portfolio management strategies, harm performance and increase Portfolio expenses for all shareholders, including long-term shareholders who do not generate these costs.

In addition, certain Portfolios may be more susceptible to the risks of short-term trading than other Portfolios. The nature of the holdings of a Portfolio may present opportunities for a shareholder to engage in a short-term trading strategy that exploits possible delays between changes in the price of a Portfolio’s holdings and the reflection of those changes in the Portfolio’s net asset value (called “arbitrage market timing”). The U.S. Small Cap Value Portfolio, the U.S. Small Cap Portfolio and the U.S. Micro Cap Portfolio may be subject to arbitrage market timing because the Portfolios have significant holdings in small cap securities, which may have prices that do not accurately reflect the latest indications of value of these securities at the time the Portfolios calculate their net asset values due to, among other reasons, infrequent trading or illiquidity. There is a possibility that arbitrage market timing may dilute the value of a Portfolio’s shares if redeeming shareholders receive proceeds (and purchasing shareholders receive shares) based upon a net asset value that does not reflect appropriate fair value prices.

The Boards of Directors of the Funds (collectively, the “Board”) have adopted a policy (the “Trading Policy”) and the Advisor and DFA Securities LLC (collectively, “Dimensional”) and Dimensional’s agents have implemented the following procedures, which are designed to discourage and prevent market timing or excessive short-term trading in the Funds: (i) trade activity monitoring and purchase blocking procedures; and (ii) use of fair value pricing.

The Funds, Dimensional and their agents monitor trades and flows of money in and out of the Portfolios from time to time in an effort to detect excessive short-term trading activities, and for consistent enforcement of the Trading Policy. The Funds reserve the right to take the actions necessary to stop excessive or disruptive trading activities, including refusing or canceling purchase or exchange orders for any reason, without prior notice,

particularly purchase or exchange orders that the Funds believe are made on behalf of market timers. The Funds, Dimensional and their agents reserve the right to restrict, refuse or cancel any purchase or exchange request made by an investor indefinitely if the Funds or Dimensional believe that any combination of trading activity in the accounts is potentially disruptive to a Portfolio. In making such judgments, the Funds and Dimensional seek to act in a manner that is consistent with the interests of shareholders. For purposes of applying these procedures, Dimensional may consider an investor's trading history in the Portfolios, and accounts under common ownership, influence or control.

In addition to the Funds' general ability to restrict potentially disruptive trading activity as described above, the Funds also have adopted purchase blocking procedures. Under the Funds' purchase blocking procedures, where an investor has engaged in any two purchases and two redemptions (including redemptions that are part of an exchange transaction) in a Portfolio in any rolling 30 calendar day monitoring period (i.e., two "round trips"), the Funds and Dimensional intend to block the investor from making any additional purchases in that Portfolio for 90 calendar days (a "purchase block"). If implemented, a purchase block will begin at some point after the transaction that caused the investor to have engaged in the prohibited two round-trips is detected by the Funds, Dimensional, or their agents. The Funds and Dimensional are permitted to implement a longer purchase block, or permanently bar future purchases by an investor, if they determine that it is appropriate.

Under the Funds' purchase blocking procedures, the following purchases and redemptions will not trigger a purchase block: (i) purchases and redemptions of shares having a value in each transaction of less than \$25,000; (ii) purchases and redemptions by U.S. registered investment companies that operate as fund of funds and non-U.S. investment companies that operate as fund of funds that the Funds or Dimensional, in their sole discretion, have determined are not designed and/or are not serving as vehicles for excessive short-term or other disruptive trading (in each case, the fund of funds shall agree to be subject to monitoring by Dimensional); (iii) purchases and redemptions by a feeder portfolio of a master fund's shares; (iv) systematic or automated transactions where the shareholder, financial advisor or investment fiduciary does not exercise direct control over the investment decision; (v) retirement plan contributions, loans, loan repayments and distributions (including hardship withdrawals) identified as such in the retirement plan recordkeeper's system; (vi) purchase transactions involving transfers of assets, rollovers, Roth IRA conversions and IRA recharacterizations; (vii) purchases of shares with Portfolio dividends or capital gain distributions; (viii) transfers and reregistrations of shares within the same Portfolio; and (ix) transactions by 529 Plans. Notwithstanding the Funds' purchase blocking procedures, all transactions in Portfolio shares are subject to the right of the Funds and Dimensional to restrict potentially disruptive trading activity (including purchases and redemptions described above that will not be subject to the purchase blocking procedures).

The Funds, Dimensional or their designees will have the ability, pursuant to Rule 22c-2 under the Investment Company Act of 1940 (the "1940 Act"), to request information from financial intermediaries, such as 401(k) plan administrators, trust companies and broker dealers (together, "Intermediaries"), concerning trades placed in omnibus and other multi-investor accounts (together, "Omnibus Accounts"), in order to attempt to monitor trades that are placed by the underlying shareholders of these Omnibus Accounts. The Funds, Dimensional and their designees will use the information obtained from the Intermediaries to monitor trading in the Funds and to attempt to identify shareholders in Omnibus Accounts engaged in trading that is inconsistent with the Trading Policy or otherwise not in the best interests of the Funds. The Funds, Dimensional or their designees, when they detect trading patterns in shares of the Funds that may constitute short-term or excessive trading, will provide written instructions to the Intermediary to restrict or prohibit further purchases or exchanges of shares of the Portfolios by a shareholder that has been identified as having engaged in excessive or short-term transactions in the Portfolios' shares (directly or indirectly through the Intermediary's account) that violate the Trading Policy.

The ability of the Funds and Dimensional to impose these limitations, including the purchase blocking procedures, on investors investing through Intermediaries is dependent on the receipt of information necessary to identify transactions by the underlying investors and the Intermediary's cooperation in implementing the Trading Policy. Investors seeking to engage in excessive short-term trading practices may deploy a variety of strategies to avoid detection, and despite the efforts of the Funds and Dimensional to prevent excessive short-term trading, there is no assurance that the Funds, Dimensional or their agents will be able to identify those shareholders or curtail their trading practices. The ability of the Funds, Dimensional and their agents to detect and limit excessive short-term trading also may be restricted by operational systems and technological limitations.

Transactions in certain rebalancing programs and asset allocation programs, or fund-of-funds products, may be exempt from the Trading Policy subject to approval by the CCO. In addition, the purchase blocking procedures will not apply to a redemption transaction in which a Portfolio distributes portfolio securities to a shareholder in-kind, where the redemption will not disrupt the efficient portfolio management of the Portfolio/Master Fund and the redemption is consistent with the interests of the remaining shareholders of the Portfolio/Master Fund.

The purchase blocking procedures of the Trading Policy do not apply to shareholders whose shares are held on the books of certain Intermediaries that have not expressly adopted procedures to implement this Policy. The Funds and Dimensional may work with Intermediaries to implement purchase blocking procedures or other procedures that the Funds and Dimensional determine are reasonably designed to achieve the objective of this Trading Policy. At the time the Intermediaries adopt these procedures, shareholders whose accounts are on the books of such Intermediaries will be subject to the Trading Policy's purchase blocking procedures or another frequent trading policy that achieves the objective of the purchase blocking procedures. Investors that invest in the Portfolios through an Intermediary should contact the Intermediary for information concerning the policies and procedures that apply to the investor.

As of the date of this Prospectus, the ability of the Funds and Dimensional to apply the purchase blocking procedures on purchases by all investors and the ability of the Funds and Dimensional to monitor trades through Omnibus Accounts maintained by Intermediaries may be restricted due to systems limitations of both the Funds' service providers and the Intermediaries. The Funds expect that the application of the Trading Policy as described above, including the purchase blocking procedures (subject to the limitations described above), will be able to be implemented by Intermediaries in compliance with Rule 22c-2 under the 1940 Act.

In addition to monitoring trade activity, the Board has adopted fair value pricing procedures that govern the pricing of the securities of the Portfolios and the Master Funds. These procedures are designed to help ensure that the prices at which Portfolio shares are purchased and redeemed are fair, and do not result in dilution of shareholder interests or other harm to shareholders. See the discussion under "**VALUATION OF SHARES—Net Asset Value**" for additional details regarding fair value pricing of the Portfolio's securities.

Although the procedures are designed to discourage excessive short-term trading, none of the procedures individually nor all of the procedures taken together can completely eliminate the possibility that excessive short-term trading activity in a Portfolio may occur. The Portfolios and the Master Fund do not knowingly accommodate excessive or disruptive trading activities, including market timing.

Valuation of Shares

NET ASSET VALUE

The net asset value per share of each class of each Portfolio and the net asset value per share of the Master Fund is calculated after the close of the NYSE (normally, 4:00 p.m. ET) by dividing the total value of the investments and other assets of the Portfolio or Master Fund less any liabilities, by the total outstanding shares of the stock of the respective Portfolio or Master Fund. Note: The time at which transactions and shares are priced may be changed in case of an emergency or if the NYSE closes at a time other than 4:00 p.m. ET.

The value of the shares of each Non-Feeder Portfolio will fluctuate in relation to its own investment experience. The value of the shares of the Feeder Portfolio will fluctuate in relation to the investment experience of the Master Fund in which such Portfolio invests. Securities held by the Portfolios and the Master Fund will be valued in accordance with applicable laws and procedures adopted by the Board of Directors or Trustees, and generally, as described below.

Securities held by the Portfolios and the Master Fund (including over-the-counter securities) are valued at the last quoted sale price of the day. Securities held by the Portfolios and the Master Fund that are listed on Nasdaq are valued at the Nasdaq Official Closing Price ("NOCP"). If there is no last reported sale price or NOCP of the day, the Portfolios and the Master Fund value the securities within the range of the most recent quoted bid and asked prices. Price information on listed securities is taken from the exchange where the security is primarily traded.

Generally, options will be valued using the same pricing methods discussed above. Generally, securities issued by open-end investment companies, such as the Master Fund, are valued using their respective net asset values or public offering prices, as appropriate, for purchase orders placed at the close of the NYSE.

Debt securities will be valued on the basis of prices provided by one or more pricing services or other reasonably reliable sources including broker/dealers that typically handle the purchase and sale of such securities. Securities which are traded over-the-counter and on a stock exchange generally will be valued according to the broadest and most representative market, and it is expected that for bonds and other fixed income securities, this ordinarily will be the over-the-counter market.

The value of the securities and other assets of the Portfolios and the Master Fund for which no market quotations are readily available (including restricted securities), or for which market quotations have become unreliable, are determined in good faith at fair value in accordance with procedures adopted by the Board of Directors or Trustees, as the case may be. Fair value pricing may also be used if events that have a significant effect on the value of an investment (as determined in the discretion of the Advisor) occur before the net asset value is calculated. When fair value pricing is used, the prices of securities used by the Portfolios and the Master Fund may differ from the quoted or published prices for the same securities on their primary markets or exchanges.

To the extent that a Portfolio or the Master Fund holds large numbers of securities, it is likely that it will have a larger number of securities that may be deemed illiquid and therefore must be valued pursuant to special procedures adopted by the Board of Directors or Trustees, than would a fund that holds a smaller number of securities. Portfolios that invest in small capitalization companies are more likely to hold illiquid securities than would a fund that invests in larger capitalization companies.

Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. There can be no assurance that a Portfolio or Master Fund could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Portfolio or Master Fund determines its net asset value per share. As a result, the sale or redemption by a Portfolio or Master Fund of its shares at net asset value, at a time when a holding or holdings are valued at fair value, may have the effect of diluting or increasing the economic interest of existing shareholders.

The Portfolios and the Master Fund generally calculate their net asset values per share and accept purchase and redemption orders on days that the NYSE is open for trading.

Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. The value of such futures contracts held by a Portfolio or Master Fund is determined each day as of such close. Swap contracts generally are valued at a price at which the counterparties to such contracts would repurchase the instrument or terminate the contracts. Structured note agreements are valued in accordance with a dealer-supplied valuation based on changes in the value of the underlying index.

PUBLIC OFFERING PRICE

Provided that the transfer agent has received the investor's purchase order in good order as described in "**PURCHASE OF SHARES**," shares of the Portfolio selected will be priced at the public offering price, which is the net asset value of the shares next determined after receipt of such order. The transfer agent or the Funds may, from time to time, appoint sub-transfer agents or various financial intermediaries ("Intermediaries") for the receipt of purchase orders, redemption orders and funds from certain investors. Intermediaries, in turn, are authorized to designate other financial intermediaries ("Sub-designees") to receive purchase and redemption orders for the Portfolios' shares from investors. With respect to such investors, the shares of the Portfolio selected will be priced at the public offering price calculated after receipt of the purchase order by the Intermediary or Sub-designee, as applicable, that is authorized to receive purchase orders. If the investor buys shares through an Intermediary or a Sub-designee, the purchase price will be the public offering price next calculated after the Intermediary or Sub-designee, as applicable, receives the order, rather than on the day the custodian receives the investor's payment (provided that the Intermediary or Sub-designee, as applicable, has received the investor's purchase order in good order, and the investor has complied with the Intermediary's or Sub-designee's payment procedures). No reimbursement fee or sales charge is imposed on purchases. If an order to purchase

shares must be canceled due to non-payment, the purchaser will be responsible for any loss incurred by a Portfolio arising out of such cancellation. The Funds reserve the right to redeem shares owned by any purchaser whose order is canceled to recover any resulting loss to a Portfolio and may prohibit or restrict the manner in which such purchaser may place further orders.

When authorized by a Fund, certain financial institutions purchasing a Portfolio's shares on behalf of customers or plan participants may place a purchase order unaccompanied by payment. Payment for these shares must be received by the time designated by the Fund (not to exceed the period established for settlement under applicable regulations). If payment is not received by this time, the order may be cancelled. The financial institution is responsible for any costs or losses incurred by the Fund if payment is not received or delayed.

Exchange of Shares

Investors may exchange Institutional Class shares of one Portfolio for Institutional Class shares of another Portfolio by first contacting the Portfolio's transfer agent at (888) 576-1167 to notify the transfer agent of the proposed exchange, and then sending a letter of instruction to the transfer agent by an approved method. Shareholders that invest in the Portfolios through a financial intermediary should contact their financial intermediary for information regarding exchanges.

Exchanges are accepted into those Portfolios that are eligible for the exchange privilege, subject to the purchase requirement set forth in the applicable Portfolio's prospectus. Investors may contact the transfer agent at the above-listed phone number for more information on such exchanges, for a list of those Portfolios that accept exchanges, and to request a copy of the prospectuses of other Portfolios of DFA Investment Dimensions Group Inc. or Dimensional Investment Group Inc. that may be offered in an exchange. There is no fee imposed on an exchange. However, the Funds reserve the right to impose an administrative fee in order to cover the costs incurred in processing an exchange. Any such fee will be disclosed in the Prospectus. An exchange is treated as a redemption and a purchase. Therefore, an investor could realize a taxable gain or a loss on the transaction. The Funds reserve the right to revise or terminate the exchange privilege, or limit the amount of or reject any exchange, as deemed necessary, at any time.

The exchange privilege is not intended to afford shareholders a way to speculate on short-term movements in the markets. Accordingly, in order to prevent excessive use of the exchange privilege that may potentially disrupt the management of the Portfolios or otherwise adversely affect the Funds, any proposed exchange will be subject to the approval of the Advisor. Such approval will depend on: (i) the size of the proposed exchange; (ii) the prior number of exchanges by that shareholder; (iii) the nature of the underlying securities and the cash position of the Portfolios involved in the proposed exchange; (iv) the transaction costs involved in processing the exchange; and (v) the total number of redemptions by exchange already made out of a Portfolio. Excessive use of the exchange privilege is defined as any pattern of exchanges among portfolios by an investor that evidences market timing.

The redemption and purchase prices of shares redeemed and purchased by exchange, respectively, are the net asset values next determined after the transfer agent has received a letter of instruction in good order. "Good order" means a completed letter of instruction specifying the dollar amount to be exchanged, signed by all registered owners (or representatives thereof) of the shares; and if a Fund does not have on file the authorized signatures for the account, proof of authority. Exchanges will be accepted only if the shares of the Portfolio being acquired are registered in the investor's state of residence.

Redemption of Shares

REDEMPTION PROCEDURE

Investors who desire to redeem shares of a Portfolio must first contact the Portfolio's transfer agent at (888) 576-1167. Shareholders who invest in the Portfolios through a financial intermediary should contact their financial

intermediary regarding redemption procedures. Each Portfolio will redeem shares at the net asset value of such shares next determined, after receipt of a written request for redemption in good order, by the transfer agent (or by an Intermediary or a Sub-designee, if applicable). "Good order" means that the request to redeem shares must include all necessary documentation, to be received in writing by the transfer agent no later than the close of regular trading on the NYSE (normally, 4:00 p.m. ET ("Market Close")), including but not limited to, a letter of instruction specifying the number of shares or dollar amount to be redeemed, signed by all registered owners (or representatives thereof) of the shares and, if a Fund does not have on file the authorized signatures for the account, proof of authority. It is the investor or financial intermediary's responsibility to ensure notification is received in good order by the transfer agent prior to the Market Close on the redemption date.

Under certain conditions, Portfolios may accept and process redemption orders after the close of the NYSE on days that the NYSE unexpectedly closes early and may accept orders on a business day that the NYSE is unexpectedly closed. All orders will be processed at the next determined net asset value per share.

Shareholders redeeming shares who do not already have an agreement in place with a Fund and have authorized redemption payment by wire in writing, may request that redemption proceeds be paid in federal funds wired to the bank they have designated in writing. The Funds reserve the right to send redemption proceeds by check in their discretion; a shareholder may request overnight delivery of such check at the shareholder's own expense. If the proceeds are to be wired to a bank account that differs from the standing instructions on file, or paid by check to an address other than the address of record, the transfer agent may request a Medallion Signature Guarantee. If the proceeds are wired to the shareholder's account at a bank that is not a member of the Federal Reserve System, there could be a delay in crediting the funds to the shareholder's bank account. The Funds reserve the right at any time to suspend or terminate the redemption by wire procedure after prior notification to shareholders. No fee is charged for redemptions. The redemption of all shares in an account will result in the account being closed. A new Account Registration Form will be required for future investments. See "**PURCHASE OF SHARES.**" In the interests of economy and convenience, certificates for shares are not issued.

For redemption proceeds that are paid directly to a shareholder by a Portfolio, each Portfolio typically expects to send (via check, wire or automated clearing house) redemption payments within 1 business day after receipt of a written request for redemption in good order by the transfer agent. For payments that are made to an intermediary for transmittal to a shareholder, each Portfolio expects to pay redemption proceeds to the intermediary within 1 to 2 business days following the Portfolio's receipt of the redemption order from the intermediary. Under certain circumstances and when deemed in the best interest of a Portfolio, redemption proceeds may take up to seven calendar days to be sent after receipt of the redemption request. In addition, with respect to investors redeeming shares that were purchased by check, payment will not be made until the Funds can verify that the payments for the purchase have been, or will be, collected, which may take more than seven calendar days. Investors may avoid this delay by submitting a certified check along with the purchase order.

Redemption proceeds will typically be paid by Federal Reserve wire payment. A Portfolio typically expects to satisfy redemption requests from available cash and cash equivalents or the sale of portfolio assets. In certain circumstances, such as stressed market conditions, a Portfolio may use other methods to meet redemptions, including the use of a line of credit or participating in an interfund lending program in reliance on exemptive relief from the SEC. In addition, as described below, a Portfolio reserves the right to meet redemption requests through an in-kind redemption, typically in response to a particularly large redemption, at the request of a client or in stressed market conditions. Also, see "**Redemption and Transfer of Shares**" in the SAI for information regarding redemption requests that exceed \$250,000 or 1% of the value of a Portfolio's assets, whichever is less.

REDEMPTION OF SMALL ACCOUNTS

With respect to each Portfolio, the Funds reserve the right to redeem an account if the value of the shares in a specific Portfolio is \$500 or less. Before a Fund involuntarily redeems shares from such an account and sends the proceeds to the stockholder, the Fund will give written notice of the redemption to the stockholder at least sixty days before the redemption date. The stockholder will then have sixty days from the date of the notice to make an additional investment in order to bring the value of the shares in the account for a specific Portfolio to more than \$500 and avoid such involuntary redemption. The redemption price to be paid to a stockholder for shares

redeemed by a Fund under this right will be the aggregate net asset value of the shares in the account at the close of business on the redemption date.

IN-KIND REDEMPTIONS

When in the best interests of a Portfolio, a Portfolio that is not a Feeder Portfolio may also make a redemption payment, in whole or in part, by a distribution of portfolio securities that the Portfolio owns in lieu of cash. When in the best interests of the Feeder Portfolio, the Portfolio may make a redemption payment, in whole or in part, by a distribution of portfolio securities that the Feeder Portfolio receives from the Master Fund in lieu of cash. Such distributions may be pro rata or another method that is determined to be fair to both the redeeming shareholder and the remaining shareholders in accordance with policies and procedures adopted by a Fund. The securities that the investor receives as redemption proceeds are subject to market risk until the investor liquidates those securities, and, if the proceeds include illiquid securities, the investor will bear the risk of not being able to sell the securities at all. Investors may also incur brokerage charges and other transaction costs selling securities that were received in payment of redemptions. Investors may incur charges in converting such securities to dollars and the value of the securities may be affected by currency exchange fluctuations.

The Feeder Portfolio

Other institutional investors, including other mutual funds, may invest in the Feeder Portfolio's Master Fund. Accordingly, the expenses of such other funds and, correspondingly, their returns may differ from those of the Feeder Portfolio. Please contact The DFA Investment Trust Company at 6300 Bee Cave Road, Building One, Austin, TX 78746, (512) 306-7400 for information about the availability of investing in a Master Fund other than through the Feeder Portfolio.

The aggregate amount of expenses for the Feeder Portfolio and its corresponding Master Fund may be greater than it would be if the Portfolio were to invest directly in the securities held by the corresponding Master Fund. However, the total expense ratios for the Feeder Portfolio and the Master Fund are expected to be less over time than such ratios would be if the Portfolio were to invest directly in the underlying securities. This arrangement enables various institutional investors, including the Feeder Portfolio, to pool their assets, which may be expected to result in economies by spreading certain fixed costs over a larger asset base. Each shareholder in the Master Fund, including the Feeder Portfolio, will pay its proportionate share of the expenses of that Master Fund.

The shares of the Master Fund will be offered to institutional investors for the purpose of increasing the funds available for investment, to reduce expenses as a percentage of total assets and to achieve other economies that might be available at higher asset levels. Investment in the Master Fund by other institutional investors offers potential benefits to the Master Fund, and through its investment in the Master Fund, the Feeder Portfolio also. However, such economies and expense reductions might not be achieved, and additional investment opportunities, such as increased diversification, might not be available if other institutions do not invest in the Master Fund. Also, if an institutional investor were to redeem its interest in the Master Fund, the remaining investors in the Master Fund could experience higher pro rata operating expenses, thereby producing lower returns, and the Master Fund's security holdings may become less diverse, resulting in increased risk. Institutional investors that have a greater pro rata ownership interest in the Master Fund than the Feeder Portfolio could have effective voting control over the operation of the Master Fund.

If the Board of Directors of the Fund determines that it is in the best interest of the Feeder Portfolio, the Feeder Portfolio may withdraw its investment in the Master Fund at any time. Upon any such withdrawal, the Board would consider what action the Portfolio might take, including either seeking to invest its assets in another registered investment company with the same investment objective as the Portfolio, which might not be possible, or retaining an investment advisor to manage the Portfolio's assets in accordance with its own investment objective, possibly at increased cost. Shareholders of the Feeder Portfolio will receive written notice thirty days before the effective date of any change in the investment objective of its Master Fund. A withdrawal by the Feeder Portfolio of its investment in the Master Fund could result in a distribution in kind of portfolio securities (as opposed to a cash distribution) to the Portfolio. Should such a distribution occur, the Portfolio could incur

brokerage fees or other transaction costs in converting such securities to cash in order to pay redemptions. In addition, a distribution in kind to the Portfolio could result in a less diversified portfolio of investments and could affect adversely the liquidity of the Portfolio. Any net capital gains so realized will be distributed to such the Portfolio's shareholders as described in "**DIVIDENDS, CAPITAL GAINS DISTRIBUTIONS AND TAXES.**"

Disclosure of Portfolio Holdings

Each Portfolio and the Master Fund generally will disclose up to its 25 largest portfolio holdings (or with respect to the Feeder Portfolio, the holdings of the Master Fund) (other than cash and cash equivalents) and the percentages that each of these largest portfolio holdings represent of the total assets of the Portfolio or Master Fund, as of the most recent month-end, online at the Advisor's public website, <http://us.dimensional.com>, within 20 days after the end of each month. Each Portfolio and the Master Fund also generally will disclose its complete portfolio holdings (or with respect to the Feeder Portfolio, the holdings of the Master Fund) (other than cash and cash equivalents), as of month-end, online at the Advisor's public website, 30 days following the month-end or more frequently and at different periods when authorized in accordance with the Portfolios' and Master Fund's policies and procedures. Each Portfolio and Master Fund may, but is not required to, disclose a list of portfolio securities that generally would be included as proceeds in a redemption in-kind, as frequently as on a daily basis, online at the Advisor's public Web site. Please consult the SAI for a description of the other policies and procedures that govern disclosure of the portfolio holdings by the Portfolios and the Master Fund.

Delivery of Shareholder Documents

To eliminate duplicate mailings and reduce expenses, the Portfolios may deliver a single copy of certain shareholder documents, such as this Prospectus and annual and semi-annual reports, to related shareholders at the same address, even if accounts are registered in different names. This practice is known as "householding." The Portfolios will not household personal information documents, such as account statements. If you do not want the mailings of these documents to be combined with other members of your household, please call the transfer agent at (888) 576-1167. We will begin sending individual copies of the shareholder documents to you within 30 days of receiving your request.

Financial Highlights

The Financial Highlights table is meant to help you understand each Portfolio's financial performance for the past 5 years or, if shorter, the period of that Portfolio's operations, as indicated by the table. The total returns in the table represent the rate that you would have earned (or lost) on an investment in the Portfolio, assuming reinvestment of all dividends and distributions. This information has been audited by PricewaterhouseCoopers LLP, whose report, along with the Portfolios' financial statements, is included in the annual reports. Further information about the Portfolios' performance is contained in the annual reports, which are available upon request.

Computed using average shares outstanding.

**The Net Investment Income (Loss) per share and the ratio of Net Investment Income to Average Net Assets includes the effect of an estimation related to a one time distribution from a real estate investment trust. Net Investment Income (Loss) per share, Net Gain (Loss) per share and the ratio of Net Investment Income to Average Net Assets would have been \$0.92, \$7.69 and 2.43%, respectively had the effect of this estimation not been considered.

Other Available Information

You can find more information about the Funds and their Portfolios in the Funds' SAI and Annual and Semi-Annual Reports.

Statement of Additional Information

The SAI, incorporated herein by reference, supplements, and is technically part of, this Prospectus. It includes an expanded discussion of investment practices, risks, and fund operations.

Annual and Semi-Annual Reports to Shareholders

These reports focus on Portfolio holdings and performance.

The Annual Report also discusses the market conditions and investment strategies that significantly affected the Portfolios in their last fiscal year.

How to get these and other materials:

- Your investment advisor—you are a client of an investment advisor who has invested in the Portfolios on your behalf.
- The Fund—you represent an institutional investor, registered investment advisor or other qualifying investor. Call collect at (512) 306-7400.
- Access them on our Web site at <http://us.dimensionalfund.com>.
- Access them on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>.
- Obtain them, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.
